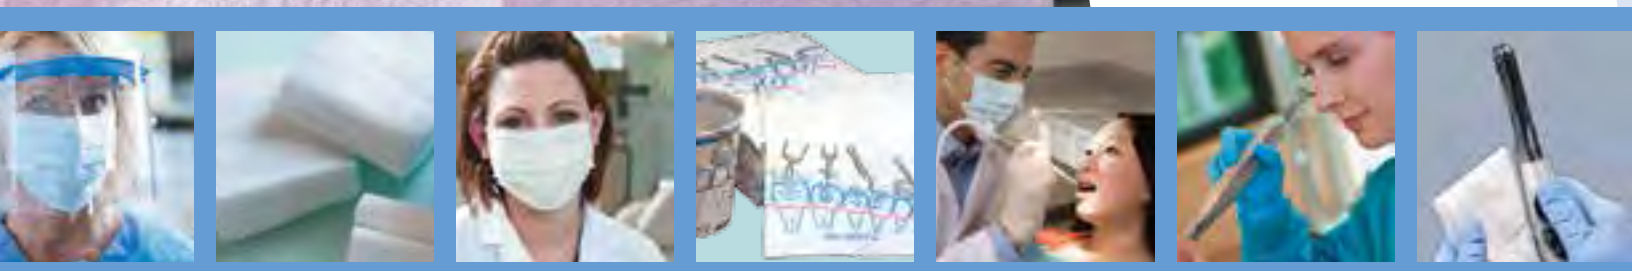
TIDI PRODUCTS



GUARDING AGAINST INFECTION™

TIDI® focuses on you, the healthcare professional, continually evaluating your needs. So we understand that it's imperative to create an exam environment that presents a professional image and makes patients feel comfortable. It's essential that exam products be easy and convenient to use. And it's critical to minimize any chance for cross contamination.

In response, we engineer specific single-use infection prevention solutions to meet these needs. You can be confident in our reliable, consistent product quality, assured by our certification in ISO 9001 and ISO 13485.

With these assurances, healthcare professionals confidently reach for TIDI's® single-use infection control products to maintain a hygienic environment, put staff and patients at ease, and focus on care.

Clear Choices for Confident Care

Our simplified product organization includes three distinct levels that clearly describe our differentiated, value-added products, based on insight gleaned from healthcare professionals. This makes it easy to choose the best TIDI® products for your procedures, your environment, and the comfort and convenience of you and your patients.

PRODUCT LEVELS

U Ultimate

High-performance products designed with thoughtful features for the highest-quality care, making the professional's job easier while enhancing the patient experience.

C Choice

A wide variety of convenient, high-quality products that offer comfort and protection on demand.

E Everyday

Economical single-use products that provide functional everyday protection.

BIB CHAIN STUDIES

The following are outcomes of several small studies recently conducted on bib holders. One study, conducted by Noel Kelsch, RDHAP, assessed the role bib holders play in harboring microorganisms. In comparing levels of bacterial found on used bib holders with those found in airport restrooms, similar levels of bacteria were observed - as well as increased levels of microbial contamination in the crevices of the bib holders, including underneath smooth tubing. Of note, the bib holders sampled were reported to have already been disinfected with a hospital grade disinfectant.[1]

Kelsch's findings are enclosed in a study conducted by the University of North Carolina that led to the conclusion that bib holders are potential sources of contamination, with one in five bib clips sampled having significant levels of microorganisms. Importantly, bacterial growth on the bib holders was largely attributed to saliva and plaque as well as skin and flesh, and included E. coli and Staph aureus.[2]

TIDI® Tooth

made in USA

SHEATHS + BARRIERS

Aid in the protection from cross contamination for equipment, instruments and other surfaces in the exam environment.

PATENT PENDING

TIDIShield™ X-Ray Sensor Sheaths

Custom fit for ergonomic handling. Soft, rounded edges for greater patient comfort.

TIDIShield™ Camera Covers

with *The SureClear Window™*

COMPETITOR SHEATH

A competitor's camera sheath gives the dentist a blurry image, making the view of the tooth difficult

TIDISHIELD™ BARRIER

The TIDIShield™ Custom Barrier, with it's tight fit around the camera, provides a perfect clear view and superior infection prevention

NO SHEATH

Without a protective sheath, the intra-oral camera offers an unobstructed view, but with the threat of cross-contamination

NEW

TIDIShield™ Curing Light Sleeves

with *The SureCure Window™*

CONFIDENT CURES

The TIDIShield™ Curing Light Sleeve with The SureCure Window™ is proven to produce surfaces as well cured as those where no barrier is used.

INFECTION PREVENTION

Unique individually wrapped, easy-peel outer wrapping protects inner sleeve from contamination. Eliminates the potential for bacteria build-up on curing light surfaces.

COMFORT

Custom fit with soft, rounded edges for greater patient comfort.

COST-EFFECTIVE

Extends the life of equipment by reducing the need for harsh disinfectants on your curing light. Prevents hard to remove composite build up on the curing light tip.

made in USA

TIDIShield™ INTRA-ORAL CAMERA COVERS

with *The SureClear Window™*

- Custom fit that eliminates distortion
- SureClear Window™ for superior image quality
- Individually wrapped for enhanced infection prevention
- Extends the life of equipment by eliminating the need for harsh disinfectants
- Unique easy peel design
- Not made from natural latex rubber
- Instructions for use printed directly on the packaging
- Reorder part number printed on the sleeve

SPECIALTY GLOVES

TIDI's® glove line includes Latex Free Nitrile Gloves

Latex Gloves deliver superior protection while cleaning and sterilizing instruments. Made with natural rubber latex, all gloves have been tested to applicable ASTM standards.

made in USA

NITRILE 12" GLOVES

Nitrile Gloves provide a non-latex alternative that provide extra protection while handling instruments during the cleaning, rinsing, drying, packaging and sorting procedures that take place during Instrument Reprocessing.

- Latex Free
- Powder-Free
- 8 mils at fingertips
- Ambidextrous for quick and easy donning
- Textured for added grip
- Beaded cuff
- 12 inches long for additional protection

TIDIShield™

made in USA

TIDISHIELD™ PROCEDURE FACEMASKS

Experience the difference with TIDIShield™ Fluid Resistant Procedure facemasks and compare the quality to traditional tissue lined facemasks typically used in dental offices. Proudly made in the USA to maximize comfort and protection.

9040DB
Ocean Blue

9040DSA
Pink Punch

9040DY
Lemon Drop

9040DL
Lavender Swirl

MAXIMUM-COMFORT - Extremely soft and lightweight material; perfect for longer wear.

IMPROVED EARLOOP DESIGN - Longer, rounded earloops that will not pull or slice into ears.

SUPERIOR BREATHABILITY - Lightweight material that is latex-free, fiberglass-free, odorless and non-irritating allowing you to breath easier.

FLUID RESISTANT - Water repellent SMS material prevents liquids from passing through the mask.

UNIQUE DESIGN - 3-ply downward pleat design provides an exact fit and eliminates the chance for fluid pooling.

CODE	COLOR/PRINT	UNIT QUANTITY	LEVEL	DESCRIPTION
9040DB	Ocean Blue	10 boxes of 50/500 facemasks/case	Level 2	TIDIShield™ Fluid Resistant Procedure Facemask
9040DSA	Pink Punch	10 boxes of 50/500 facemasks/case	Level 2	TIDIShield™ Fluid Resistant Procedure Facemask

ASTM F2100-07 Performance Classes for Facemasks

TIDIShield™ Facemasks are tested with the ASTM F2100-07 “Standard for Performance of Materials Used in Medical Facemasks.” This is the only specific standard available that provides performance classes for facemasks to fall into.

REQUIREMENTS	9040DB 9040DSA	9040DY 9040DL	9010 9020
ASTM F1862 Resistance to penetration by synthetic blood (mm HG)	120	80	160
ASTM F2101 Bacterial Filtration Efficiency (BFE)	≥ 95	≥ 99	≥ 99
ASTM F2299 Particulate Filtration Efficiency (PFE)	≥ 99	≥ 99	≥ 99
Delta P Breathability	< 2.0	< 2.0	< 5.0
Flame Spread	Class 1	Class 1	Class 1

The performance classes rate from low, moderate and high barrier.

TIDIShield™

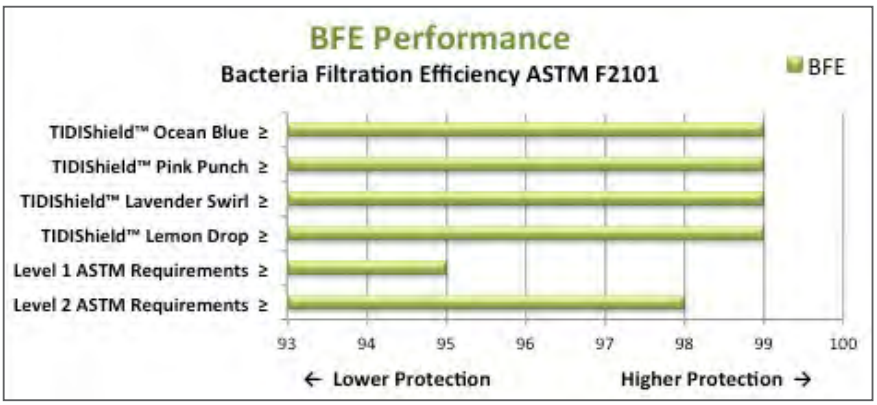
TIDISHIELD™ PROCEDURE FACEMASKS

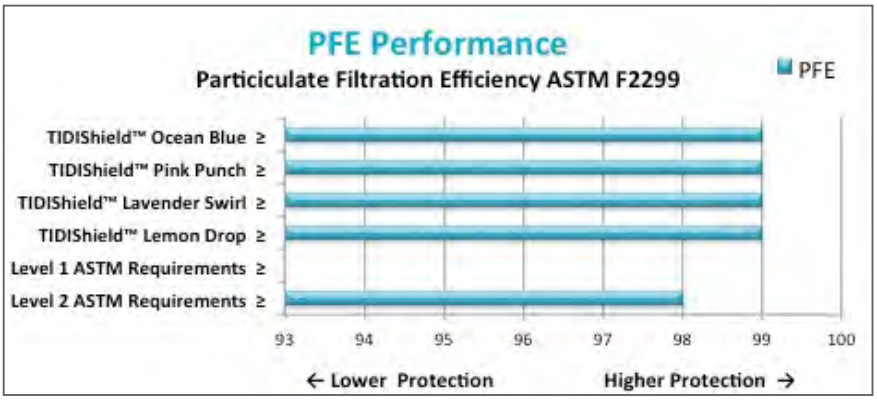
Reliable Protection with TIDIShield™–

- OSHA recommends changing masks during patient treatments if the mask becomes wet to maintain high filterabiltiy.
- Made from a water repellent SMS material that prevents liquid from passing through.
- Provides lasting superior protection during extended procedures compared to tissue-lined facemasks that can absorb fluid and lose their protective barrier properties once wet.

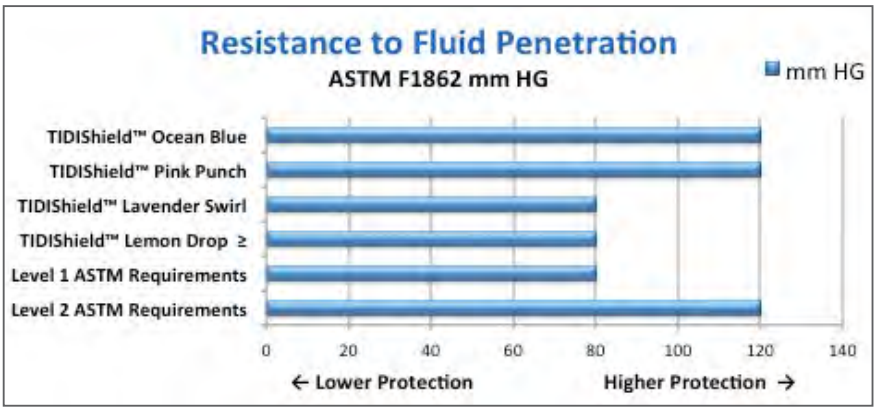
Superior Protection with TIDIShield™

- Exceeds the required ASTM Level 1 BFE & PFE filtration testing standards; offering you superior protection compared to traditional Level 1 procedure facemasks.
- Ocean Blue and Pink Punch masks are more resistant than Level 1 procedure facemasks to fluid penetration and meet ASTM Level 2 requirements.





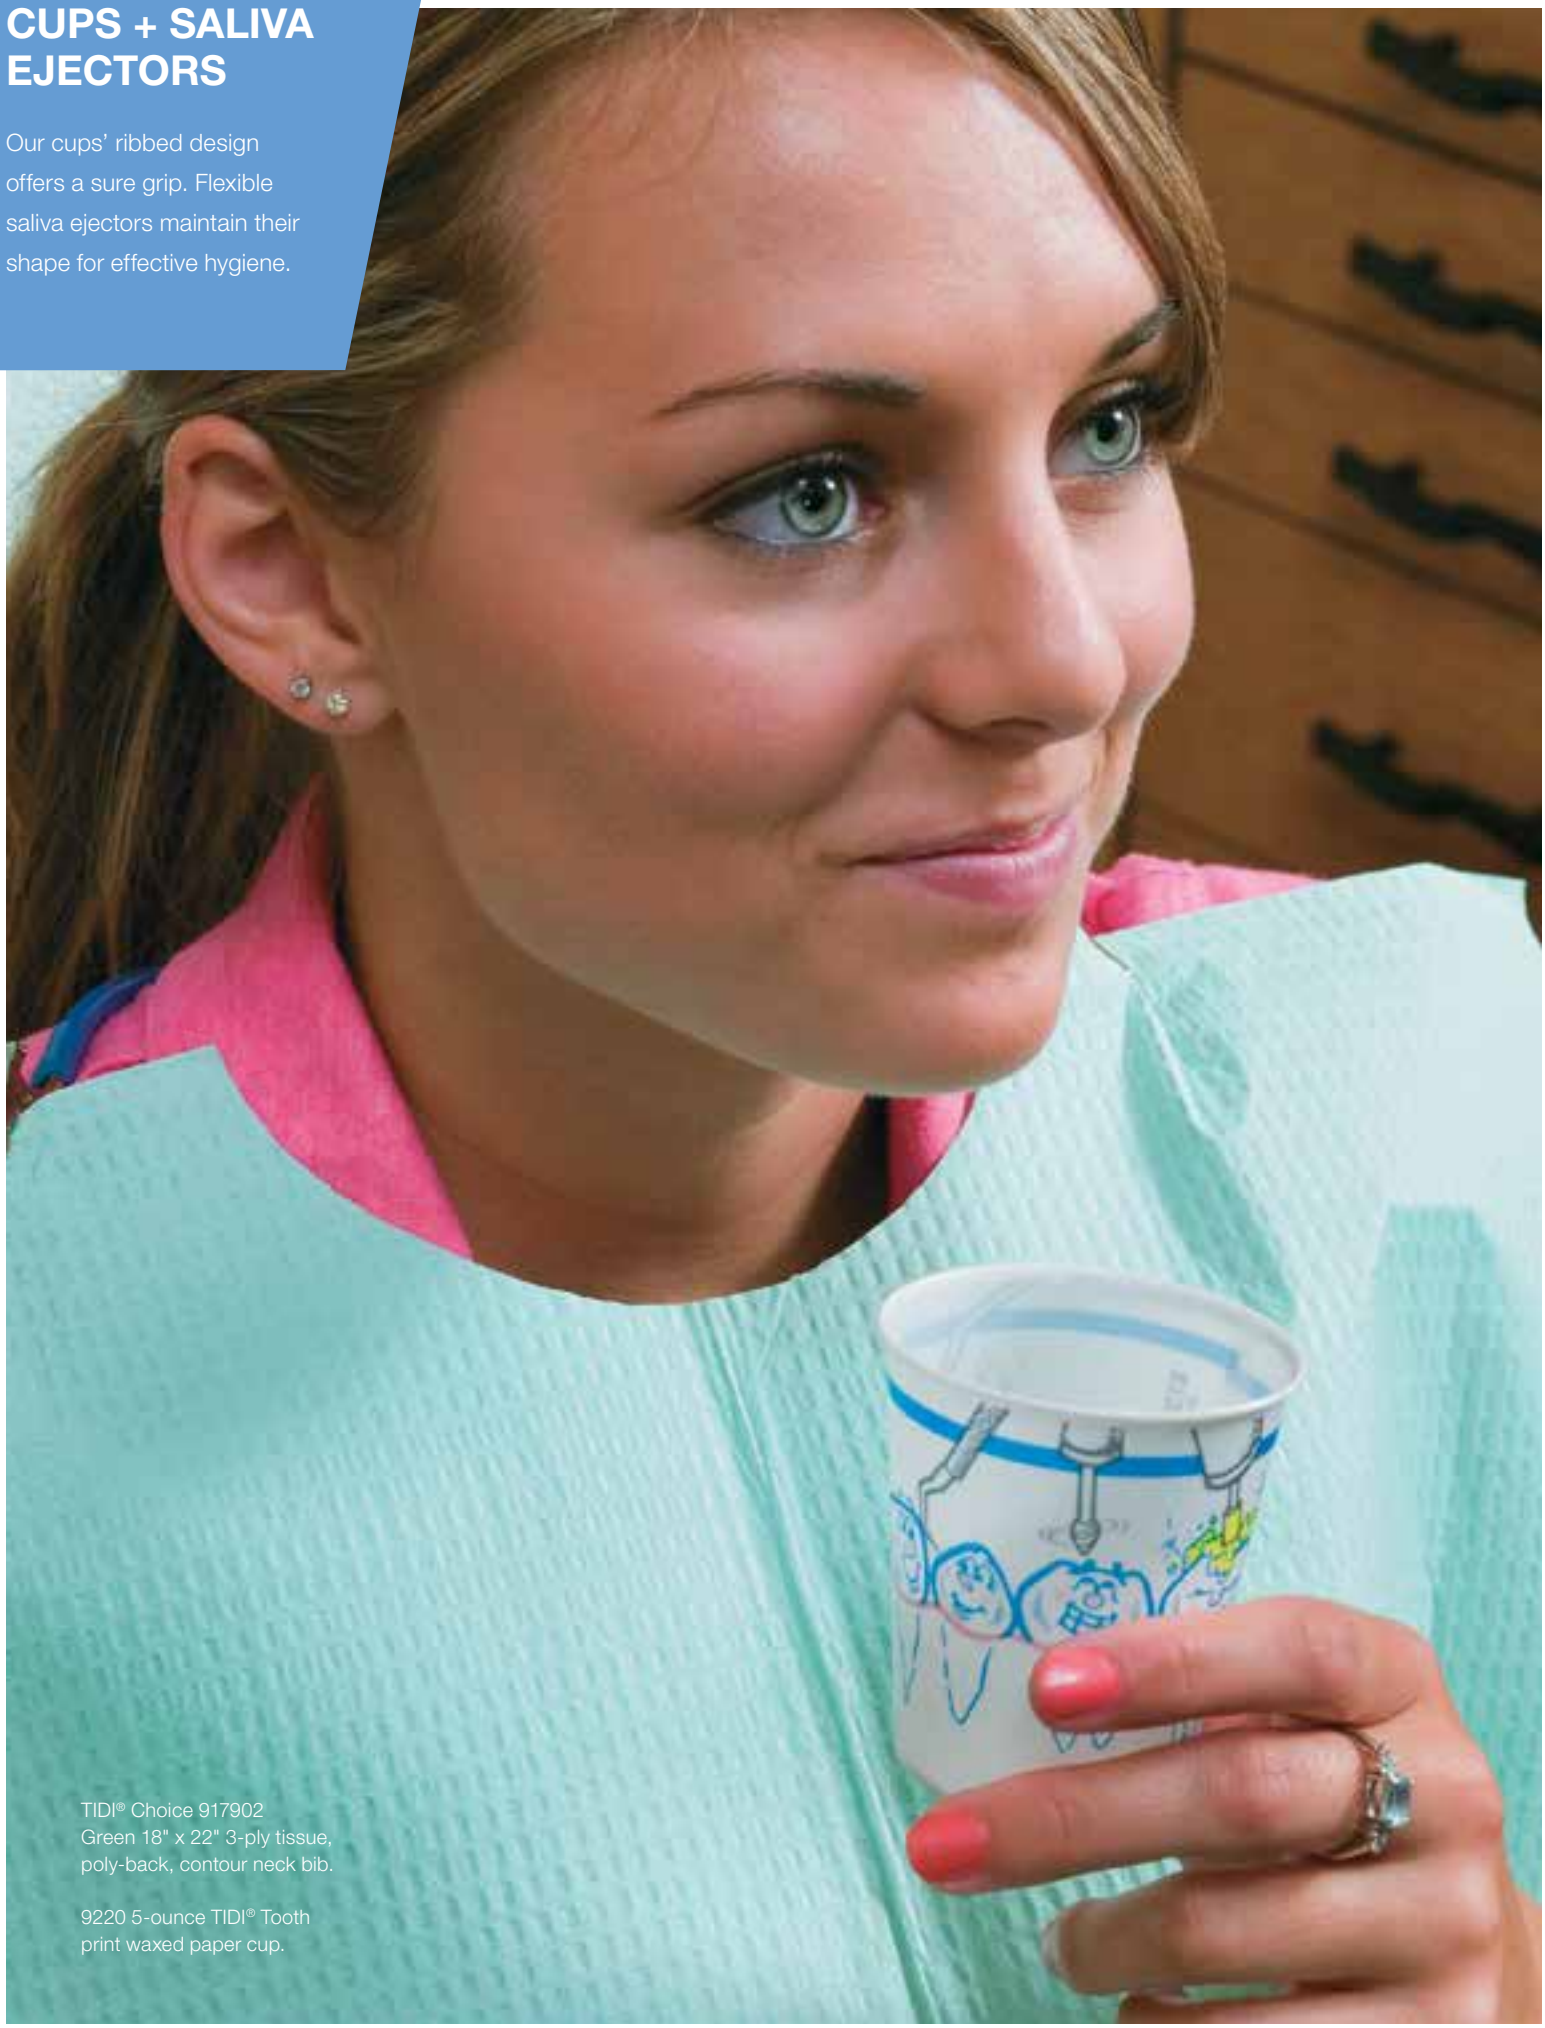
Not Required for Level 1 Facemasks



made in USA

CUPS + SALIVA EJECTORS

Our cups' ribbed design offers a sure grip. Flexible saliva ejectors maintain their shape for effective hygiene.



TIDI® Choice 917902
Green 18" x 22" 3-ply tissue, poly-back, contour neck bib.

VENTURE™	260003	3" x 3"	4000 (20 sleeves of 200)	4-ply (open weave), non-sterile
VENTURE™	260004	4" x 4"	2000 (10 sleeves of 200)	4-ply (open weave), non-sterile

DURAWICK™ COUNTER TOWEL

DuraWick™ counter towels were specially created to be used to last through several rounds of tools being placed on them from your ultrasonic cleaning. The top layer of material wicks away moisture, which is then absorbed into the middle layer of the product, keeping your sterilization area clean and sanitary.

CODE	COLOR/PRINT	SIZE	UNIT QUANTITY	DESCRIPTION
983914	Blue	13" x 18"	100	Wicking towel for ultrasonlic tool cleaning, 3-ply Rayon/Tissue/Poly

CSR WRAP

Sterilization wrap conforms easily around various shapes and maintains its wrapped integrity to provide barrier protection against saline, blood and water while allowing effective penetration for a variety of sterilization methods.

CODE	COLOR/PRINT	SIZE	UNIT QUANTITY	DESCRIPTION
960172	Blue	12" x 12"	1000	Sterilization wrap
960173	Blue	15" x 15"	1000	Sterilization wrap
960174	Blue	18" x 18"	500	Sterilization wrap
960175	Blue	20" x 20"	500	Sterilization wrap
960176	Blue	24" x 24"	500	Sterilization wrap
960177	Blue	30" x 30"	400	Sterilization wrap
960178	Blue	36" x 36"	200	Sterilization wrap

STERILIZATION POUCHES

Self-sealing and have external color indicators for peace of mind.

CODE	COLOR/PRINT	SIZE	UNIT QUANTITY	DESCRIPTION

911900	Blue	13-1/2" x 17-1/2"	500 (10 boxes of 50)	4-ply tissue, super soft, highly absorbent, edge-embossed

GLOSSARY

T/P/T: tissue/poly/tissue

A layer of polyethylene film, sandwiched between two sheets of tissue, adds strength and resistance against fluid strike-through to the soft, absorbent tissue.

Tissue (2-ply, 3-ply and 4-ply)

TIDI® offers tissue products in configurations to suit a range of needs. Multiple tissue plies add absorbency and strength, while two-ply tissue provides economical softness and absorbency that is well suited for shorter procedures.

Poly

A layer of premium linear polyethylene provides high tensile strength and reliable barrier properties.

FABRICEL®

A proprietary material that fuses a sheet of soft, supple facial-grade tissue and a layer of polyethylene film. This heat lamination process creates a very soft yet super-strong, tear-resistant material that prevents soak-through.

TIDI® Cust om Barriers

TIDI® Products is proud to partner with manufacturers of dental and medical devices that require a custom-fit infection control barrier. Our design team works with manufacturers to create custom sheaths that aid in the protection from cross contamination while allowing healthcare professionals to use the instrument without the barrier interfering with the procedure. If you are a manufacturer and would like more information on how we can develop a custom barrier for your device, please **contact TIDI® Customer Service at 800-521-1314.**

TIDI® supports the Forest Stewardship Council and responsible forestry.

Certified in ISO 9001 and EN/ISO 13485
