BurButler

No Spilling or Rusting
Every Practice Needs This!

BurButler, the universal silicone bur block that grips all burs securely in place, eliminating the risk of spilling. The fully autoclavable, high temperature resistant silicone base is extremely durable and retains integrity, even after repeated sterilization. There are no replacement plugs or moving parts and the burs will not magnetize or rust. The 5, 10, and 25-hole configurations are available in 5 colors, which allows you to organize, store, and care for your dental burs by dentist, procedure, or lab technique to make your business more efficient.

- Ideal for all shanks including FG, CA, HP and short shank – mix and match burs
- Easy to insert and remove
- Long-lasting and durable, no moving parts or replacement plugs
- Fully autoclavable – Fast cooling
- High temperature resistant silicone base
- 5, 10 and 25-hole blocks available in 5 assorted colors
- 25-hole is available in a short or tall (HP) lid

Every dental assistant knows the frustration of fishing out burs from the ultrasonic and to open a sterilization pouch, only to find most of your burs are now loose in the pouch and not in their place in the bur block! The BurButler has eliminated these issues for me.

Brenda Kirken, RDA
Oxford, Michigan

Finally a bur block that burs do not fall out or rust!
Thanks Shofu. I love this product!
