Superior price-value
equation

The essentials you need. The quality you expect. Value that can't be beat.

Health Care professionals will not compromise on quality when it comes to protection. For professionals who seek great quality in their consumable essentials from a brand name they trust, Medicom introduces a new line of products, SafeBasics, that provide the protection and quality you expect, at a value that can't be beat.

The next step in this complete line of product essentials, Medicom is proud to introduce a new range of options in saliva ejectors. Medicom SafeBasics Saliva Ejectors are made from high quality materials and are designed to ensure protection that you can always count on, with the latest engineering advances, new colours, new scents, new packaging with 5 extra in every pack.

Top quality

Medicom SafeBasics single-use saliva ejectors are among the very best the market can offer. We use only select raw materials, cutting edge production processes and conduct ongoing research aimed at constant improvement in performance, all to guarantee best in class quality standards.

Our saliva ejectors are made of certified medical atoxic plastic, according to the latest edition of the European Pharmacopeia.

Comfort and maximum safety

The filter insert is completely rounded and comfortable, without sharp points or edges to protect delicate gums and can even be used on sore gums. The tip is attached via an advanced melting process that ensures total safety and protection from detachment.

The tip surface is smoother, to allow air to flow even in the event of blockage, preventing patient pain or irritation.

Every wire has its place

The metal wire is fit solidly in the tube, to avoid any chance of it coming out of either end. This will guarantee that the desired shape is maintained perfectly.

Always in shape

The high flexibility and total lack of kinks guarantees high filtration capacity. The safe and simple shaping of the saliva ejectors makes it easy to adapt to any kind of mouth.

Medicom SafeBasics Saliva Ejectors: New Line offers a range of colours and scent innovation to suit every need.

New, attractive colours in blue, pink and lavender that can compliment office decor and add a little brightness to the day. New scented mint and strawberry saliva ejectors use the latest in flavor technology through the infusion of essential oils into the plastic resin. As market leaders, we are the first to offer strawberry scent in North America.
