TIDI

At TIDI Products, we understand that it's imperative to create an exam environment that presents a professional image and a chance to make both patients and clinicians comfortable. Even more important, it is essential that exam products and personal protection equipment be easy, comfortable, and convenient to use while minimizing any chance for cross-contamination.

TIDI's single-use infection prevention products help clinicians maintain a hygienic environment, put staff and patients at ease, and focus on care. We engineer single-use infection prevention solutions to meet your needs, assured by our EN/ISO 13485 certification.

Visit **tidiproducts.com** for additional product information and resources.

Clear Choices for Confident Care

Our simplified product portfolio features distinct levels that clearly describe our differentiated, value-added products based on insight gleaned from healthcare professionals. This makes it easy to choose the best TIDI products for your procedures, your environment, and a comfortable experience for you and your patients.

TIDI IS FOCUSED ON REDUCING RESOURCE CONSUMPTION TO SUPPORT SUSTAINABILITY EFFORTS.

Personal Protective Equipment

Personal protective equipment (PPE) is defined by the Occupational Safety and Health Administration (OSHA) as "specialized clothing or equipment worn by an employee for protection against infectious materials."

8573 | Gown

Infection prevention planning is a core priority to providing the safest environment for both the patient and the healthcare professional. With proper care and personal protective equipment, the spread of infections by hospital personnel may be reduced.

WHY PPE?

Protecting healthcare personnel and patients from infectious diseases is more important than ever. These groups are exposed to infections within healthcare settings daily. Studies reveal:

• Infections contracted in hospitals are the fifth largest killer in America. Every year, two million patients in the United States contract infections[1]

• The annual direct medical cost for hospital-acquired infections to U.S. Hospitals ranges from $45 billion to $33.8 billion[1]

• Nearly 1.7 million hospitalized patients annually acquire healthcare-associated infections while being treated for other health issues. More than 98,000 patients (one in 17) die due to these.

PROTECTIVE GOWNS

Not all situations call for the same gown. TIDI Products offers protective gowns in five different materials to provide the correct gown for the task at hand.

TIDISHIELD® GOWN

- Made from soft, embossed polyethylene

- An open back allows for increased airflow and comfort

- The closed-loop neck allows the user to slip the gown over the head and tear off quickly

- Thumb loops keep the gown in place so wrists are protected from fluids and infectious material

- Not manufactured with natural rubber latex, offering a hypoallergenic solution

- Dispenser box is compact and uses 75% less space than conventional isolation gown packaging

CODE	COLOR	SIZE	UNIT QTY.	DESCRIPTION
8576	Light Blue	Universal	5 dispensers of 15 gowns; 75 gowns/case	Polyethylene Gown. Open back, thumbloop cuff

8576 | TIDIShield® Gowns with loop neck design

Features thumb loop cuffs that provide added protection to the vulnerable wrist areas and make donning gloves easy

8576 | TIDIShield® Gowns Dispenser box is compact and uses 75% less space than conventional isolation gown packaging

WWW.TIDIPRODUCTS.COM | 1.800.521.1314

TIDISHIELD® POLYETHYLENE GOWN

- An open back allows for increased airflow and comfort

- The closed-loop neck allows the user to slip the gown on over the head and tear off quickly

- Thumb loops keep the gown in place so wrists are protected from fluids and infectious material

- Not manufactured with natural rubber latex, offering a hypoallergenic solution

TIDIShield Polyethylene Gowns offer durability at an economic price without sacrificing safety or comfort.

CODE	COLOR	SIZE	UNIT QTY.	DESCRIPTION

8627	Mint Green	40 gal	200	Trash can liners, heavy-duty poly, 1.15 mil

Glossary

SMS: SPUNBOND/MELTBLOWN/SPUNBOND
This multi-layer, nonwoven material is made of fine synthetic fibers for superior softness, strength, and liquid repellent.

T/P/T: TISSUE/POLY/TISSUE
A layer of polyethylene film sandwiched between two sheets of tissue. It adds strength and resistance against fluid leak-through to the soft, absorbent tissue.

TISSUE (2-PLY, 3-PLY AND 4-PLY)
TIDI offers tissue products in configurations to suit a range of needs. Multiple tissue piles add absorbency and strength, while 2-ply tissue provides economical softness and absorbency well suited for shorter procedures.

SMOOTH/CREPE EXAM TABLE BARRIERS
Choose smooth paper with added liquid holdout, or the softer, more comfortable surface feel of crepe.

POLY
A layer of premium octane linear polyethylene that provides high tensile strength and reliable barrier properties.

DOUBLE RE-CREPE (DRC)
Double Re-Crepe material provides a soft, cloth-like feel for durable absorbency.

FABRICEL®
A proprietary material that fuses a sheet of soft, supple tissue and a layer of polyethylene film. This heat lamination process creates a very soft, yet strong tear-resistant material that prevents leak-through.

SCRIM-REINFORCED TISSUE
We fortify our high-quality tissue by fusing nylon-woven netting directly into the fiber matrix for a soft, yet durable tear-resistant fabric ideal for extended procedures.

NONWOVEN
Synthetic materials are bonded into a web of fibers. Nonwoven garments are ideal for longer and more involved procedures as they provide patient comfort, strength, and durability. TIDI also offers nonwoven materials in our wound care selections.
