TIDISHIELD & CDC GUIDELINES

TIDI's line of face shields align with CDC guidelines* regarding using appropriate PPE to protect the eyes, nose, and mouth. According to the CDC, healthcare providers should implement universal use of personal protective equipment and:

- Wear eye protection in addition to their facemask to ensure the mucous membranes of the eyes, nose, and mouth are all protected from exposure to respiratory secretions during patient care encounters
- Select masks, goggles, face shields, and combinations of each according to the need anticipated by the task performed
