2019 Dental Catalog

CROSSTEX
A CANTEL MEDICAL COMPANY

Dedicated to delivering innovative infection prevention products & services for patients, caregivers, and other healthcare providers, which improve outcomes and help save lives.

Table of Contents

Chemistries

Crosstex offers a broad range of powerful solutions for cleaning, surface disinfection and instrument reprocessing.

Proper reprocessing of reusable devices is critical to ensuring patient safety and avoiding cross-contamination. Cleaning solutions, including high-, intermediate- and low-level instrument and surface disinfectants as well as enzymatic detergents for cleaning sensitive instruments and evacuation lines are among the many products available. Many of these solutions are non-corrosive and pH-neutral, for maximum compatibility with instruments, equipment and surfaces.

5

Surface Disinfectants

⦿ SaniTex Plus™ 2
Cleaner, Sanitizer & Disinfectant

- **EPA registered** – Intermediate-level disinfectant (tuberculocidal, bactericidal, virucidal and fungicidal).

- **Low alcohol/quaternary ammonium formulation** - Ready-to-use solution provides exceptional cleaning and disinfection on a wide array of hard, non-porous surfaces and equipment in dental settings.

- **Broad spectrum with rapid action** – effective against 22 microorganisms in 2 minutes including TB, bloodborne pathogens, bacteria, viruses and fungi.

- **3-in-1 product** – Clean, sanitize, and disinfect with one product.

EPA REG NO.: 70144-1-64285

⦿ SaniTex Plus™
Cleaner, Disinfectant & Deodorizer

- **EPA registered** – Intermediate-level disinfectant (tuberculocidal, bactericidal, virucidal and fungicidal).

- **Low alcohol/quaternary ammonium formulation** – Ready-to-use solution provides excellent cleaning and disinfecting capabilities on a broad range of hard, non-porous surfaces and equipment in dental settings.

- **Broad spectrum** – Effective against 21 microorganisms in 6 minutes including TB, bloodborne pathogens, bacteria, viruses and fungi.

EPA REG NO.: 1130-15-64285

🟡 Sani-Cloth® AF3
Germicidal Disposable Wipe

- **EPA registered** – Intermediate-level disinfectant (tuberculocidal, bactericidal and virucidal).

- **Unique, alcohol-free/quaternary ammonium formulation** – designed for disinfecting a broad range of surfaces and equipment in dental settings.

- **Broad spectrum** – Effective against 45 microorganisms in 3 minutes, including TB, bloodborne pathogens, bacteria and viruses.

- **Reliable** – Ready-to-use, thick, strong pre-moistened wipe has high fluid capacity and is pliable to get into crevices and corners of equipment.

EPA REG NO.: 9480-9

Sani-Cloth® AF3 Germicidal Disposable Wipe

Ref. #	Description	Quantity
SANAFL3 (P13872)	Large Wipe 6 in x 6.75 in (15.2 cm x 17.1 cm)	160/Canister
SANAFXL23 (P63884)	Extra Large Wipe 7.5 in x 15 in (19.1 cm x 38.1 cm)	65/Canister
SANAFLI3 (H59200)	Large Individual Packet 5 in x 8 in (12.7 cm x 20.3 cm)	50/Box
SANAFXL2I3 (U27500)	Extra-Large Individual Packet 11.5 in x 11.75 in (29.2 cm x 29.8 cm)	50/Box

🟡 Super Sani-Cloth®
Germicidal Disposable Wipe

- **EPA registered** – Intermediate-level disinfectant (tuberculocidal, bactericidal and virucidal).

- **Fast-acting alcohol/quaternary ammonium formulation** – Ideal for use in fast-paced environments requiring short contact time and broad coverage of microorganisms, allowing for quick room/operatory turnover on a broad range of surfaces and equipment in dental settings.

- **Broad spectrum** – Effective against 30 microorganisms in 2 minutes including TB, bloodborne pathogens, bacteria and viruses.

- **Reliable** – Ready-to-use, thick, strong pre-moistened wipe has high fluid capacity and is pliable to get into crevices and corners of equipment.

EPA REG NO.: 9480-4

Super Sani-Cloth® Germicidal Disposable Wipe

Ref. #	Description	Quantity

SANXLSI (U87295)	Extra-Large Individual Packet 11.5 in x 11.75 in (29.2 cm x 29.8 cm)	50/Box

🟡 Sani-Cloth® Bleach
Germicidal Disposable Wipe

- **EPA registered** – Intermediate-level disinfectant (sporicidal, tuberculocidal, bactericidal, virucidal and fungicidal).

- **High risk prevention** – Stabilized dilution of sodium hypochlorite (bleach) ideal for disinfecting high risk areas endemic with *Clostridium difficile (C. diff)* spores and Norovirus.

- **Broad spectrum** – Effective against 50 microorganisms in 4 minutes including *C. diff* spores, TB, bloodborne pathogens, bacteria, viruses and fungi.

- **Reliable** – Ready-to-use, thick, strong pre-moistened wipe has high fluid capacity and is pliable to get into crevices and corners of equipment.

EPA REG NO.: 9480-8

All wipes not made with natural rubber latex.

Sani-Cloth® Bleach Germicidal Disposable Wipe

Ref. #	Description	Quantity
SANLB2 (P54072)	Large Wipe 6 in x 10.5 in (15.2 cm x 26.6 cm)	75/Canister

SANLB (H58195)	Large Individual Packet 5 in x 7 in (12.7 cm x 17.7 cm)	40/Box
SANXLB2I (U26595)	Extra-Large Individual Packet 11.5 in x 11.75 in (29.2 cm x 29.8 cm)	40/Box

Surface Disinfectants

⦿ SaniTex Plus™
Germicidal Disposable Wipe

- **EPA registered** – Low-level disinfectant (bactericidal and virucidal).

- **Low alcohol/quaternary ammonium formulation** – Ready-to-use, pre-moistened wipes saturated with the precise amount of germicidal solution to effectively clean and disinfect.

- **Broad spectrum** – Effective against 16 microorganisms in 3 minutes including bloodborne pathogens, bacteria and viruses.

- **Multiple uses** – Ideal for use in dental settings on a broad range of hard, non-porous surfaces and equipment.

EPA REG NO.: 9480-6-64285

SaniTex Plus™ Germicidal Disposable Wipe		
Ref. #	**Description**	**Quantity**
SANLC	Large Wipe 6 in x 6.75 in (15.2 cm x 17.1 cm)	160/Canister

High-Level Disinfectants/Sterilants & Accessories

🔴 Rapicide™ OPA/28 High-Level Disinfectant

- **Innovative/safe formulation** – Ready-to-use, high-level disinfectant used to reprocess heat-sensitive semi-critical instruments with an active ingredient of 0.575% ortho-phthaladehyde (OPA).

- **Fast & economical** – High-level disinfection in just 10 minutes at room temperature (68 °F/20 °C) with a reuse period of up to 28 days.†

- Excellent materials compatibility, non-corrosive to metal.

†Solution needs to be tested with Rapicide™ OPA/28 Test Strips prior to each use to verify MRC (minimum recommended concentration).

Rapicide™ OPA/28 High-Level Disinfectant		
Ref. #	Description	Quantity
ML02-0127	Bottle	1 gal (3.8 L)

Rapicide™ OPA/28 Test Strips

- **Be compliant** – Test strips are designed specifically for use with Rapicide OPA/28 High-Level Disinfectant and provide MRC (minimum recommended concentration) verification.

- **User friendly** – Large, easy-to-read indicator pad with an intuitive pass/fail reference color chart on the bottle.

- **Fast** – 3-second dip time with a 90-second read time.

Rapicide™ OPA/28 Test Strips		
Ref. #	Description	Quantity
ML02-0137	Test Strips	50/Bottle

🔴 Sani Glut™ Glutaraldehyde 3%

- **Multi-purpose formula** – Biodegradable and formaldehyde-free reusable manual liquid chemical sterilant and high-level disinfectant, for use with immersible and heat sensitive instruments and/or devices.
    - 10 hours for sterilization (at 25 °C)
    - 25 minutes for high-level disinfection (at 25 °C)

- **Activation** – Requires addition of activator (included with bottle).

- **Economical** – Provides up to 28 days of reuse.

Use appropriate test strip prior to each use to verify MRC: Micro-Scientific Micro-MEC™ 1.8% Glutaraldehyde Monitor Test Strips (M60054)

Sani Glut™ Glutaraldehyde 3%		
Ref. #	Description	Quantity
JGLUT	Bottle	1 gal (3.8 L)

Sani HLD Holder

- **Convenient** – Use with cleaners, disinfectants or cold sterilants

- **Easy-to-use** – Inner basket is easily removed and allows for convenient draining, while hinged lid contains calendar to notate when solution needs to be changed

- **High-capacity** – Holds up to 1 gal (3.8 L) of solution

Sani HLD Holder		
Ref. #	Description	Quantity
JHOLD	13⅞ in x 9⅝ in x 5⅛ in (35.2 cm x 24.4 cm x 13.0 cm)	Each

Cleaning Solutions & Detergents

●●● Sani ProZyme™ Enzymatic Detergent

- **Reliable, powerful formulation** – Protease enzymes break down organic soils such as blood, tissue and protein rich fluids.

- **Cost effective and safe** – Highly concentrated, low-foaming, biodegradable, phosphate-free, rust-inhibiting properties with a neutral pH; perfect for manual or automated washing.

- **Usage** – Dilute 0.5 oz to 2 oz per gallon of water; each bottle makes up to 256 gallons of solution (depending upon debris level).

- **Manual soak time:** 2 to 3 min (15 to 20 min for heavy debris).

Sani ProZyme™ Enzymatic Detergent		
Ref. #	Description	Quantity
JED	Bottle	1 gal (3.8 L)

●●● CrossZyme™ Concentrated Ultrasonic Cleaner

- **Low-foaming, enzymatic formulation** – Provides effective cleaning to remove blood and organic debris immediately from instruments and easy rinsing over a wide range of concentrations and temperatures; powerfully chelated to improve performance in hard water conditions.

- **Biodegradable** - free from phosphate and chloride components to enhance the removal of blood and proteinaceous fluids.

- **Neutral pH** – safe for use on instruments and endoscopes, plastic, stainless steel, glass and aluminum; contains rust inhibitors and is non-corrosive.

- **Usage** – 1:20 dilution (general cleaning); 1:10 dilution (heavy cleaning).

CrossZyme™ Concentrated Ultrasonic Cleaner		
Ref. #	Description	Quantity
JEZ	Bottle	1 gal (3.78 L)

●●●● EfferZyme™ Enzymatic Cleaning Tablets

- **Enzymatic formula** – Biodegradable, non-chlorine formulation contains fast-acting protease enzymes that enhance the removal of blood and other soils that may be resistant to other chemical detergents.

- **Neutral pH formula** – Contains no harsh alkaline components and is non-corrosive.

- **Cost effective** – Tablet formulation reduces shipping, handling and storage costs.

- **Usage** – 2 tablets per 1 gallon of water; each box makes 26 gallons of solution.

EfferZyme™ Enzymatic Cleaning Tablets		
Ref. #	Description	Quantity
JET	Effervescent Tablets	52/Box

●● General Purpose Ultrasonic Cleaner, Non-ammoniated Concentrate

- **Multi-purpose formula** – Used for the removal of buffing compounds, pumice, rouge, tripoli, food particles, foreign matter and soils of all types.

- **Safe** – Use on dentures, burs, bridges, crowns, orthodontic appliances, instruments, diamonds and glass slides.

- **Usage** – Dilute 1 part concentrate with 10 parts water; use as an ultrasonic carrier bath when an auxiliary beaker is used for other cleaning tasks.

- **Cleaning time** – 2 to 10 minutes.

General Purpose Ultrasonic Cleaner, Non-ammoniated Concentrate		
Ref. #	Description	Quantity
JEZNA	Bottle	1 gal (3.785 L)

●● Tartar & Stain Remover

- **Powerful** – Proven biodegradable and phosphate-free ultrasonic acidic cleaner* for the removal of tartar, tobacco and food stains, permanent cement, certain temporary cements, solder, rust and hard water scale from bridges, dentures and orthodontic appliances.

- **Ready-to-use** – No dilution required.

- **Cleaning time** – 5 to 10 minutes.

Not to be used directly in an ultrasonic bath, rather place solution in a beaker first before adding to ultrasonic bath.

Tartar & Stain Remover		
Ref. #	Description	Quantity
JEZTS	Bottle	1 gal (3.785 L)

● Sani Vac™ Evacuation System Cleaner

- **Superior cleaning** - Unique, low-foaming, multi-proteolytic enzymatic formula efficiently removes dental debris by breaking down saliva, mucous and blood as well as neutralizes odor in evacuation lines.

- **Compatible** - Biodegradable, pH-neutral and non-oxidizing solution meets the EPA's BMP's for Dental Amalgam Waste[^] to promote continuous, high-performance suction in wet/dry vacuum systems and amalgam separators.

- **Reduced risk** – Routine cleaning will help prevent downtime and costly line repairs by ensuring evacuation lines remain unclogged for optimal suction and increased patient safety.[†]

- **Economical** - The highly concentrated formula offers a low cost-per-use when diluted and treats up to 3 lines per ounce of concentrate and 384 lines per gallon.

Stericenter

VistaPure™ Water Purification System
Produces high-purity process water for filling sterilizers, dental bottles and more—no more buying bottled water!

VistaCool™ Direct-to-Drain Cooling System for Autoclave Wastewater
Cools and drains autoclave wastewater automatically—saving staff time while protecting cabinets and plumbing.

Operatory

DentaPure™ Municipal Cartridge for units plumbed to city water

DentaPure™ Independent Water Bottle Cartridge
Provides 365 days (or 240L of water) of safe, compliant dental unit water

Liquid Ultra™ Solution
Multiple DUWL treatment options for bottle fed systems

Your complete dental water partner for safety, compliance and efficiency.

From waterline treatment to wastewater management, water quality affects nearly every function of modern dental offices. Poor water quality can harm patients, staff and equipment—not to mention the reputation of your practice.

Our comprehensive line of dental water products can help to improve patient care, staff productivity and practice profitability, while helping to maintain compliance with regulatory guidelines.

Municipally Plumbed Systems

DentaPure™ 365-Day Municipal Cartridge*

Easily adapted for installation onto incoming waterlines plumbed directly to city water via included poly-flo fittings.

- EPA Registered / FDA 510K Cleared.

- Cartridge reduces bacterial exposure by eluting non-allergenic, elemental iodine into dental water.

- Change every 365 days, or 240L of water.

- Crosstex reminds you when it is time to replace your cartridge.

- Not restricted by the EPA rule BMP for dental amalgam waste.

One installation provides 365 days (or 240L of water if usage records are kept) of safe, compliant dental unit water

For J-box installation

DentaPure™ 365-Day Municipal Cartridge		
Ref. #	Description	Quantity
DP365M	Municipal Cartridge	1 Each

Bottle Systems

DentaPure™ 365-Day Independent Water Bottle Cartridge*

Installs onto your unit's existing water bottle pickup tube via included luer fitting.

- EPA Registered / FDA 510K Cleared.

- Can use either tap or distilled water.

- Cartridge reduces bacterial exposure by eluting non-allergenic, elemental iodine into dental water.

- Change every 365 days, or 240L of water.

- Crosstex reminds you when it is time to replace your cartridge.

- Not restricted by the EPA rule BMP for dental amalgam waste.

One installation provides 365 days (or 240L of water if usage records are kept) of safe, compliant dental unit water

For bottle installation

DentaPure™ 60-Day Independent Water Bottle Cartridge*

Installs onto your unit's existing water bottle pickup tube via included luer fitting.

- EPA Registered / FDA 510K Cleared.

- Perfect for short-term use.

- Cartridge reduces bacterial exposure by eluting non-allergenic, elemental iodine into dental water.

- Change every 60 days, or 40L of water.

- Crosstex reminds you when it is time to replace your cartridge.

- Not restricted by the EPA rule BMP for dental amalgam waste.

One installation provides 60 days (or 40L of water if usage records are kept) of safe, compliant dental unit water

For bottle installation

Testing

Iodine Test Strips

- Test strips may be used to verify adequate levels (higher than 0.5 ppm) of iodine release.

- These tests strips are only to be used to determine the level of IODINE present in dental unit waterlines (DUWLs), and cannot be used to measure the presence of Colony Forming Units (CFUs).

Iodine Test Strips		
Ref. #	**Description**	**Quantity**
DPTEST	50 Iodine test strips	1 Bottle

Shock/In-Line Treatment

Liquid Ultra™ Solution

The powerful and versatile dental unit waterline shock treatment for external bottle systems.

- **EPA Registered**

- **Powerful** – Kills biofilm bacteria; removes existing biofilm and prevents/suppresses formation of biofilm in dental unit waterlines.

- **Versatile** – May be used as a weekly treatment; in conjunction with a tablet protocol and to rapidly treat waterlines prior to initiating a new treatment protocol, or to quickly treat DUWLs with extremely high CFU conditions.

Liquid Ultra™ Solution

Dental Water Systems

VistaPure™ Water Purification System

- Provides two grades of high-purity water for steam sterilizers, dental bottles, ultrasonic cleaners and the rinse cycle of instrument washers.
  - Steam sterilizer-ready, distilled-quality (deionized) water eliminates the need to buy distilled water or own a distiller.
  - Bottle-ready, hyperfiltered water eliminates the need to buy bottled water and ensures high-quality water for mixing with bottle and residual cleaners, and for the rinse cycle of instrument washers.
- System connects directly to municipal water supply and sends purified water anywhere in the steri-center for easy, on-demand use.
- Included with the VistaPure™ System:
  - Handheld, point-and-shoot wand makes it easy for anyone to fill steam sterilizers, no matter where they're located.
  - Mounted faucet makes it easy to fill bottles over a sink.
  - In-line and handheld TDS meters monitor water quality — and make it easy to know when it's time to replace your filters.
  - 4.25 gal water storage tank (only one storage tank required). A larger tank is available if needed.
- Low ongoing cost of system ownership.
- No electricity needed.

VistaClear™ Centralized Water Filtration System

- Provides dental practices with centralized submicron water filtration, backflow prevention and a convenient method for delivering periodic antimicrobial treatments.
- Eliminates the need for dental bottles.
- Eliminates wait-time and the need for storage tanks and bottle systems.
- Centralized, patented cleaning method makes regular waterline maintenance easier and more efficient.
- Built-in centralized, CSA-certified backflow prevention.
  - No need for costly additional backflow preventers.
  - No ongoing cost of annual inspections of reduced pressure zone (RPZ) devices.
- Eliminates the need for purchased water and the daily waterline tablets necessary for bottle systems.
- Enables dedicated waterlines for up to eight operatories.
  - Multiple systems can be networked into zones.
  - Dedicated waterlines can easily be turned on and off individually.

VistaCool™ Direct-to-Drain Cooling System for Autoclave Wastewater

- Direct-to-drain thermal reduction system that dramatically reduces the temperature of autoclave wastewater — eliminating condenser bottles and tanks.

- Eliminates the need for office staff to empty steaming-hot water bottles manually – no user maintenance required.

- Prevents autoclave wastewater from melting plumbing.

- Built-in backflow prevention meets or exceeds local plumbing code.

- Helps prevent mold & mildew caused by spills and humid environments created by exhaust from pitchers and bottles.

- Helps protect cabinets from rot and rust by sending cooled wastewater directly and safely to the drain.

- Beyond periodic visual inspections of the tubing, there is nothing more to do to ensure proper operation.

Dental Water System Accessories

DrainHub™ Multi-Port Drain Adapter

- CSA-certified, patent-pending device accepts up to eight drain connections in one small hub—saving space, cost and time.

- Easy to install: top and bottom slip hubs accept 1-1/2 in pipe; bottom hub glues into 2 in coupling.

- 1/2" NPT threaded ports accept a variety of push-to-connect, compression, and hose barb adapter fittings.

Equipment

Flexible options for your practice to deliver conscious sedation

Portable

- Can move between operatories for increased flexibility.

- Occupies less space and no requirement for central storage unit.

- Utilizes E cylinders and optimal solution when frequency of administration is low.

- Available in enclosed option to keep cylinders out of sight and make disinfection faster.

Centralized

- Optimal solution when nitrous oxide/oxygen sedation is used frequently.

- Requires central storage area for cylinders and initial investment in gas storage system.

- Utilizes G and H cylinders so more cost-effective over time.

Chairside

- Eliminate long mixed gas and vacuum hoses draping from adjacent cabinets.

- Create uncluttered, safer work zone for doctor and staff.

- Minimize displacement of patient mask caused by drag/pull and weight of long hoses.

- Kits available for a wide variety of dental chair brands.

Please visit the website at accutron-inc.com to view our full product catalog or contact our Customer Care team with questions on how to best set up nitrous oxide/oxygen sedation in your practice.

Accutron-inc.com

Complete solutions for nitrous oxide/oxygen sedation

With over 45 years of experience, Accutron by Crosstex provides industry-leading solutions for nitrous oxide/oxygen sedation. The wide portfolio of products are designed to meet the needs of the clinician and patient for conscious sedation.

Nitrous oxide/oxygen sedation can provide a valuable additional revenue stream for your practice while offering patients relaxed, comfortable experiences. The innovative portfolio of Accutron Nitrous Oxide/Oxygen Sedation equipment and accessories, includes single-use masks, scavenging systems, manifolds, flowmeter systems and associated components.

Flowmeters

Digital Ultra™ Flushmount Flowmeter

- Automatic compensation to easily adjust total flow or gas ratio while the other stays constant.

- Both digital and electronic flowtube displays for ease of use.

- Maximum nitrous oxide ratio at 70% for patient safety.

- Audible and visual alarms to notify of low oxygen.

- Oxygen fail-safe and flush for additional safety.

- Emergency oxygen resuscitation connector.

- Sealed flush surface makes it easy to disinfect or barrier-protect.

- Reliable and accurate with minimal maintenance.

- Available with remote control and printer options, as well as multiple configurations including cabinet mount and portable.

Digital Ultra™ Flushmount Flowmeter

Ref. #	Description
56600	Digital Ultra™ Flushmount Flowmeter Pkg. G (includes mounting hardware)
56800	Digital Ultra™ Flushmount Flowmeter Pkg. H (includes mounting hardware, Remote Flow System & RFS Flush Mount Faceplate)
56800-CHAIR	Digital Ultra™ Flushmount Flowmeter Pkg. H CHAIR (includes Remote Flow System A, 25 ft of Vacuum Hose and 25 ft of Mixed Gas Hoses - requires purchase of appropriate chair brand RFS chairmount kit)
56950	Digital Ultra™ Flushmount Flowmeter Pkg. I (includes mounting hardware, Accu-Vac & Accu-Vac Flush Panel Mount Faceplate)
51000	Digital Newport™ Flowmeter System (enclosed 4-Cylinder)

For full list, visit accutron-inc.com

Manifolds

Digi-Flo™ Automatic Switching Manifold

- Automatic cylinder changeover.

- Alarm with audio and visual warnings.

- Single or multiple zone valve and/or alarm panel capacity.

- Clear and precise LED numeric line pressure readings.

- Easily accessible components.

- Optional conduit adapter box available if local codes require wiring inside conduit.

Digi-Flo™ Automatic Switching Manifold

Ref. #	Description
49150	Digi-Flo™ Automatic Switching Manifold/ Alarm Pkg. A, Desk Alarm Panel (includes pre-install kit)
49250	Digi-Flo™ Automatic Switching Manifold/ Alarm Pkg. B, Wall Alarm Panel (includes pre-install kit)
49350	Digi-Flo™ Automatic Switching Manifold/ Alarm Pkg. C, Desk Alarm Panel & Security System (includes pre-install kit)
49450	Digi-Flo™ Automatic Switching Manifold/ Alarm Pkg. D, Wall Alarm Panel & Security System (includes pre-install kit)

For full list, visit accutron-inc.com

Nasal Masks

Axess™ Low Profile Nasal Mask

- Low profile design provides unencumbered access to the oral cavity.

- Fits snugly without tape or uncomfortable tubes protruding into the patient's nostril.

- Lightweight, autoclavable scavenging circuit minimizes drag and pull, enhancing patient comfort.

- Available in scented and unscented options.

- Translucent design allows visual monitoring of patient's breathing.

- Individually wrapped for greater infection protection.

- Lower cost than competing single-use disposable nasal masks.

- Single-use minimizes cross-contamination; saves staff time.

Not made with natural latex rubber.

Axess™ Low Profile Nasal Mask

Ref. #	Description	Quantity
53037-9	Small Clear Unscented	24/Box
53037-12	Small Birthday Bubblegum	24/Box
53037-16	Small Fresh Mint	24/Box
53035-9	Medium Clear Unscented	24/Box
53035-12	Medium Birthday Bubblegum	24/Box
53035-16	Medium Fresh Mint	24/Box
53034-9	Large Clear Unscented	24/Box
53034-12	Large Birthday Bubblegum	24/Box
53034-16	Large Fresh Mint	24/Box

ClearView™ Classic Nasal Mask

- Mask-in-mask design minimizes ambient nitrous oxide in operatory.

- Clear outer mask allows visual monitoring of patient's breathing.

- Soft inner mask creates improved facial seal.

- Low profile expands clinical field of view.

- Appealing colors and scents engage and relax patients.

- Single-use minimizes cross-contamination; saves staff time.

- Compatible with other scavenging circuits, including PIP+™ Scavenging Circuits.

Not made with natural latex rubber.

ClearView™ Classic Nasal Mask

Ref. #	Description	Quantity

Nasal Masks

Personal Inhaler Plus+™ Nasal Masks

- Sets the standard when it comes to conscious sedation therapy.

- Provides patients with reliable and comfortable nitrous oxide/oxygen delivery.

- Single-use minimizes cross-contamination; saves staff time.

- Lightly scented and brightly colored nasal masks.

- Unscented option also available.

- Available in small, medium and large sizes to provide options for optimal fit.

Not made with natural latex rubber.

Personal Inhaler Plus+™ Nasal Masks

Ref. #	Description	Quantity

33015-15	Large Perfect Peach	24/Box
33015-16	Large Fresh Mint	24/Box

Scavenging Circuits

Axess™ Scavenging Circuits

- Steam-sterilizable circuit is environmentally friendly and cost-effective.

- Slender, lightweight circuit is more comfortable for patients and allows unobstructed access for clinician.

- Minimizes drag and pull, so nasal mask stays in place.

Not made with natural latex rubber.

ClearView™ Scavenging Circuits

- Autoclavable.

- X-Ray compatible.

- Meets NIOSH and ADA flow rate recommendations.

- Fits most brands of flowmeters.

Not made with natural latex rubber.

ClearView™ Scavenging Circuits for Standard Bag Tee

Ref. #	Description	Quantity
43003	ClearView™ Scavenging Circuit II (includes Scavenging Circuit with Vacuum Control Valve, Corrugated Tube, Reservoir Bag and complimentary ClearView™ Single-Use Nasal Masks)	1 Package
43005	ClearView™ Scavenging Circuit I (includes Scavenging Circuit with Vacuum Control Valve and complimentary ClearView™ Single-Use Nasal Masks)	1 Package

ClearView™ Scavenging Circuits for Remote Flow Systems & Accu-Vac™

Ref. #	Description	Quantity
43004	ClearView™ Scavenging Circuit II (includes Scavenging Circuit, Corrugated Tube, Reservoir Bag and complimentary ClearView™ Single-Use Nasal Masks)	1 Package
43006	ClearView™ Scavenging Circuit I (includes Scavenging Circuit and complimentary ClearView™ Single-Use Nasal Masks)	1 Package

Scavenging Circuits

PIP+™ Scavenging Circuits

- Autoclavable.

- X-ray compatible.

- Meets NIOSH and ADA flow rate recommendations.

- Flexible system accommodates most brands of flowmeters.

Not made with natural latex rubber.

PIP+™ Scavenging Circuits for Standard Bag Tee

Ref. #	Description	Quantity
32007	PIP+™ Scavenging Circuit II (Includes Scavenging Cicuit with Vacuum Control Valve, Corrugated Tube, Reservoir Bag and complimentary PIP+™ Single-Use Nasal Masks)	1 Package
33010	PIP+™ Scavenging Circuit I (Includes Scavenging Circuit with Vacuum Control Valve and complimentary PIP+™ Single-Use Nasal Masks)	1 Package

PIP+™ Scavenging Circuits for Remote Flow Systems & Accu-Vac™

Ref. #	Description	Quantity
32009	PIP+™ Scavenging Circuit II (Includes Scavenging Cicuit, Corrugated Tube, Reservoir Bag and complimentary PIP+ Single-Use Nasal Masks)	1 Package
33008	PIP+™ Scavenging Circuit I (Includes Scavenging Circuit and complimentary PIP+™ Single-Use Nasal Masks)	1 Package

Accessories

Axess™ Capnography Adapters

- Attaches between Axess™ Nasal Mask and scavenging circuit.

- Capnography sampling takes place within the nasal mask and directly measures patient's exhalations at the source.

- Female Luer-Lok® port provides a secure connection to capnograph monitor sample line.

- Connects to either right or left side of nasal mask for additional flexibility.

- Single-use and individually wrapped to minimize cross-contamination and save staff time.

Not made with natural latex rubber.

Axess™ Capnography Adapters

Masks & PPE

		High Fluid Barrier ASTM Level 3	Moderate Fluid Barrier ASTM Level 2	Light Fluid Barrier ASTM Level 1
	ASTM F2100-11 Standards			
MaskEnomics — N95, LEVEL 3, LEVEL 2, LEVEL1 — FILTRATION SCALE	Fluid resistance, mm Hg	160	120	80
	BFE, @ 3 microns	≥98%	≥98%	≥95%
	PFE, @ 0.1 micron	≥98%	≥98%	≥95%
	Delta P, mm H_2O/cm^2	<5.0	<5.0	<4.0
	Flame spread	Class 1	Class 1	Class 1

ASTM specification definitions

- **Fluid resistance** measures the mask's ability to prevent fluids from traveling through the material. The higher the fluid resistance (filtration), the better the protection. (Measured in mm Hg.)

- **BFE (bacterial filtration efficiency)** measures the mask's ability to prevent bacteria from traveling through the material. (Measured at 3 microns.)

- **Delta P (differential pressure)** determines breathing resistance—the higher the Delta P, the less the breathability, but the better the filtration. (Measured in mm H_2O/cm^2.)

- **PFE (particulate filtration efficiency)** measures the mask's ability to prevent sub-micron particulates from traveling through the material. The size of the particles filtered is critical. (Measured at 0.1 micron.)

- **Flame spread** is a ranking derived by laboratory standard test methodology of a material's propensity to burn rapidly and spread flames.

ASTM Level 3

- Ideal for procedures where moderate to high amounts of fluid, spray and/or aerosols are produced.
- Complex oral surgery.
- Crown preparation.
- Implant placement.
- Periodontal surgery.
- Use of ultrasonic scalers (Magnetostricive and Piezo).
- Laser based applications.*
- Root planing & Scaling.

ASTM Level 2

- Ideal for procedures where light to moderate amounts of fluid, spray and/or aerosols are produced.
- Limited oral surgery.
- Endodontics.
- Prophylaxis.
- Restoratives/ compositives.
- Sealants.

ASTM Level 1

- Ideal for procedures where light amounts of fluid, spray and/or aerosols are produced.
- Patient exams.
- Operatory cleaning/maintenance.
- Impressions.
- Lab trimming, finishing & polishing.
- Orthodontics.

*Masks are considered a secondary control and are not meant to replace recommended primary engineering controls for laser plume exposure.

CAUTION: Like patients, every procedure is unique. Use your clinical judgment to determine the appropriate level of barrier protection based on the length of the procedure, the amount of fluid or aerosol, and standard precautions.

Personal Protection Equipment (PPE) is at the heart of any infection prevention program.

Crosstex manufactures an extensive portfolio of PPE to meet all your practice needs, including our Made-in-USA face masks that meet all three ASTM levels. Our award-winning Secure Fit™ Technology face masks were the first clinical face masks to feature adjustable aluminum nose and chin closures that minimize the potential of inhaling airborne contaminants by reducing gapping around the borders of the mask and provide a custom fit regardless of face shape or size.

Selecting the appropriate mask for a particular procedure is a critical component of your Personal Protective Equipment (PPE) protocol. Although masks may look similar, each mask has notable differences affecting its level of protection. Understanding ASTM performance levels can help ensure your mask will provide appropriate protection to minimize the spread of potentially infectious diseases.

Masks with Secure Fit™ Technology

⊙ Ultra™ Sensitive Earloop Mask with Secure Fit™ Mask Technology

- Fluid resistant outer layer.

- Fluid resistant, extra soft white hypoallergenic inner cellulose layer – will not lint, tear or shred.

- Free of chemicals, inks and dyes.

- Extra-long aluminum nose piece.

Ultra™ Sensitive FogFree™ Earloop Mask

- Provides all the features of Ultra™ Sensitive Earloop Mask with Secure Fit™ Mask Technology with the addition of a FogFree™ Strip on mask inner layer.

Ultra™ Sensitive FogFree™ Earloop Mask with Shield

- Provides all the features of Ultra™ Sensitive FogFree™ Earloop Mask with Secure Fit™ Mask Technology with addition of the attached optically clear, distortion-free shield.

Additional Masks

⊙ Isolator™ Plus N95 Particulate Respirator

- NIOSH approved N95 Respirator
- Meets guidelines for TB exposure control
- Resistance to penetration by synthetic blood: 160 mmHg
- Inner/outer fluid resistant layers
- Chin pocket construction

Although the N95 closely resembles a surgical mask, it is a respirator and must be used in accordance with all OSHA regulations regarding respiratory protection.

Additional Face Protection

Patient Safety Mask with Shield

- Fluid resistant.

- Covers patient's eyes and nose.

- Protects fragile eye and mucosal tissue from flying particles, spray and splatter.

- Makes patients feel safe, but not "in the dark," with attached clear-vision shield.

- Form-fitting profile, flexible materials provide maximum access to mouth.

- White spunbond inner and outer layers.

Not made with natural rubber latex.
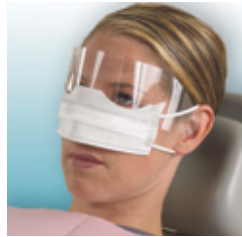

Patient Safety Mask with Shield

Ref. #	Description	Quantity
GCPAT	White	25/Box

Face Shield

- Optically clear, distortion-free wrap-around face shield.

- 1.5 in (3.81 cm) foam headband holds shield away from face; "floats" lightly on forehead, with no pressure on temples; vented for increased air flow.

- Protects mask and face from direct splatter; may prolong mask life.

- Sonically welded elastic headband for added strength.

- Anti-fog treatment on inside and outside of shield.

See Clear® Lens Cleaning Wipes

- Effective for cleaning eye protection gear, eyewear, face shields and loupes.

- Ideal for glass and polycarbonate lenses.

- Safe for use on anti-reflective, UV and glare-free coated lenses.

- Anti-fog, anti-static and anti-streaking.

- Will not scratch lenses and dries quickly.

- Light, fresh fragrance.

Mask Feature Guide

Outside

Inside
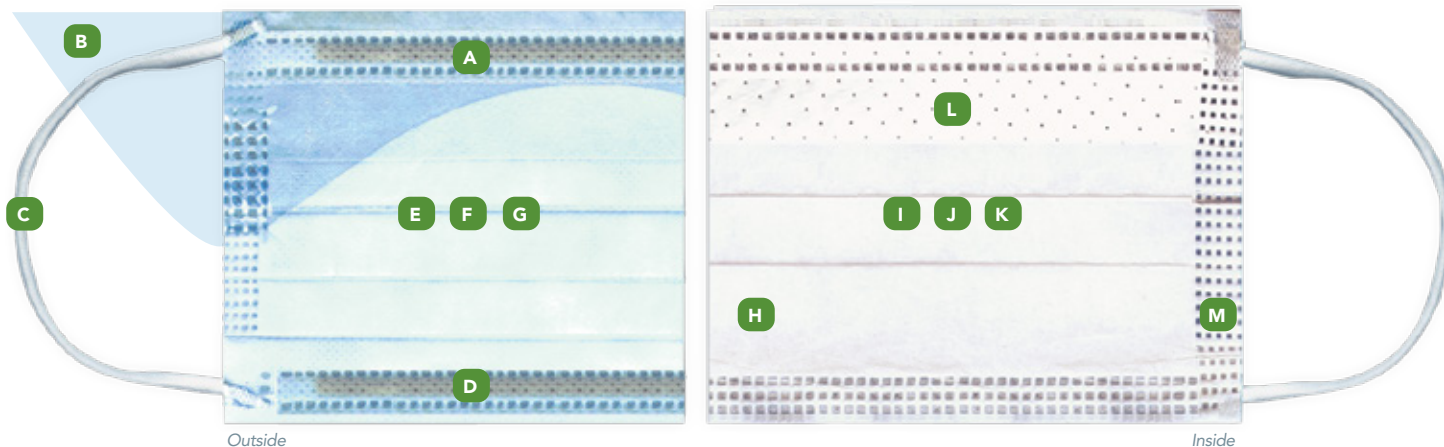

A Extra-long, enclosed aluminum nose closure forms a strong seal around nose and cheekbones for maximum protection.

B Optional attached wrap-around face shield is optically clear and distortion-free.

C The elastic, flat ear loops minimize pressure to the ears and are attached to the outside of the mask to eliminate skin irritation and provide the most comfortable fit.

D Enclosed aluminum chin closure significantly reduces gapping at the sides and bottom of the mask, minimizing the potential of inhaling airborne contaminants.

E Unique vapor barrier on the outside layer blocks moisture and prevents fogging.

F Fluid resistant, spunbond outer layer for maximum protection.

G Ultrasoft, odorless, medical grade facial tissue outer layer.

H Highest quality meltblown filter media for best filtration efficiency and breathability.

I Extra soft, white hypoallergenic inner cellulose layer for sensitive skin is free of chemicals, inks and dyes; will not lint tear or shred for ultimate comfort.

J Fluid resistant, white, spunbond inner layer.

K Soft, white medical-grade facial tissue inner layer.

L FogFree™ Strip blocks and absorbs moisture; forms a strong seal preventing fogging of eyewear while it cushions the nose ridge.

M Sof-Bond™ Ultrasonic Mask assembly ensures strongest construction and highest quality, eliminating holes and defects.

Patient Towels, Bibs, and Liners

The Crosstex succes story began with the development of our first product, the disposable patient towel. For over 60 years, we have been the benchmark of quality in patient towels, bibs, and liners. Our unique manufacturing process:

- Provides the often imitated, but never duplicated, Crosstex embossing pattern, which allows moisture to flow horizontally across the towel, protecting your patient's clothing.

- Offers our exclusive reinforced edge embossing design for added strenth and durability where towel clips are placed.

- Bonds the layers of tissue (and poly, when applicable) securely together, eliminating separation of the layers.

- Creates the strength of the towel horizontally through the combination of our proprietary manufacturing equipment and tissue formation. This prevents tearing when a towel clip is applied.

Polyback™ Contour Bib

Sani-Tab™ Chain-Free Patient Towels

Don't let infection spread from dangerous clip!

Dental bib clips and chains have been shown to pick up dangerous microorganisms from skin, saliva and plaque, presenting a potential source of cross-contamination in the dental operatory. Reduce the risk with Sani-Tab™ Chain-Free Patient Towels — the only chain-free patient towel with adhesive tabs eliminating the need for bib chains and clips. Sani-Tab maximizes infection control and patient comfort while saving time and money!

- Easy to use – simply position towel anywhere on the patient and apply pressure to the tab.

- Bib stays where placed to maximize coverage, unlike bib clips and other disposable towel holders.

- Can be placed high on patient to protect clothing.

Towel Dispenser

- Made from polished acrylic.

- Sits on counter/shelf or easily mounts to wall with supplied mounting kit.

- Accommodates folded towels up to 19 in x 13 in (48.3 cm x 33.0 cm).

- Holds approximately 50 towels.

- Front opening allows for easier grasping of towels.

Aprons & Gowns

Barrier Gowns

- Touch-tab Velcro® Closure at neckline.

- Hand-sewn ties at waist.

- Elastic cuffs to fit over gloves.

- Open back keeps wearer cooler.

- Made of 100% non-woven spun bonded polypropylene with a polyethylene coating.

Disposable barrier gowns are not intended for use as a general chemical barrier or as a surgical gown.

Barrier Gowns

Ref. #	Description	Quantity
NBG	One Size Fits All	10/Bag

Patient Barrier Aprons

Plastic & Nylon

- Protects the patient from liquids.

- Features two alligator clips attached to the front of the neck band to hold a disposable patient towel/bib and a touch-tab Velcro® Closure for fast and easy fastening.

- Available in three convenient sizes, barrier aprons may be wiped clean quickly and easily with any antibacterial product or warm soap and water.

Nylon

- Lighter in weight.

- Greater patient comfort.

Preventives

Notes

Preventives are the bedrock of dental care, and clinicians require efficient, ergonomic tools that improve the patient experience.

Designed with both professionals and patients in mind, more hygienists choose Patient's Choice™ Dental Products for preventives that offer superior patient comfort and safety while improving workflow. Efficient, ergonomic and smooth-running prophy angles team up with our patient-pleasing assortment of fluorides, varnishes and prophy pastes.

Fluoride Varnish & Trays

ProGuard™ 5% Sodium Fluoride Varnish

- Convenient, easy-to-apply, fully enclosed single-dose packaging.

- Minimal set-up and clean-up time.

- Smooth consistency with excellent flow characteristics.

- Efficient fluoride release with high substantivity.

- Sets fast, even in the presence of saliva.

- Dries to a clear finish.

- Available in mint and melon flavors.

- Sweetened with Xylitol.

- Free of: soy, milk, eggs, gluten, aspartame and saccharin.

Not made with natural rubber latex.

Prophy Angles

Twist™ Plus Oscillating Disposable Prophy Angles

- Ergonomic design improves handling.

- 120° reciprocating motion allows for continuous-contact polishing and reduces splatter.

- Robust gear mechanism provides a smooth, continuous motion.

- Recessed grip enhances the ergonomics of the angle, providing a secure and comfortable grasp.

- Smaller head improves visibility and increases maneuverability.

- Enhanced cup fluting improves interproximal application.

- Single-use.

Twist™ Plus Oscillating Disposable Prophy Angles

Prophy angles not made with natural rubber latex.

Prophy Paste

Sparkle™ Prophy Paste

- Contains 1.23% fluoride ion.

- Formulated to maximize stain removal with minimal enamel loss.

- Advanced formulation provides consistent, splatter-free results.

- Completely rinses out, leaving no residual grit.

- Available in multiple grits and flavors.

- Sweetened with Xylitol.

- Free of: nuts, soy, milk, eggs, gluten, and aspartame.

- Single-use.

- Berrylicious assorted flavors include: Raspberry, Blueberry, and Strawberry.

- Assorted flavors include: Cherry, Mint, and Orange Vanilla.

Notes

Single-Use Disposables

Notes

The items that run your practice, such as air/water syringe tips, articulating and occlusion materials and essentials such as HVE tips, evacuator tips and saliva ejectors.

Surgical and waste accessories such as scalpels, blades and sharps containers, operatory and imaging barriers, and cottons and non-wovens.

Saliva Ejectors

Safe-Flo™ Saliva Ejectors and Valves

- The unique, built-in one-way valve provides a physical barrier to prevent backflow as described in the CDC's warning on saliva ejectors.

- The valve closes when the suction is stopped or restricted to prevent residual fluids from retracting into a patient's mouth.

- The integrity of suction and performance of the saliva ejector or HVE tip is not affected, so there is no need to change how you work in order to protect your patients.

- Available as a complete saliva ejector valve system or as an adapter valve for use with your favorite brand of saliva ejectors or HVE tips.

Safe-Flo™ Saliva Ejectors

- Fully assembled saliva ejector with Safe-Flo™ Valve replaces your current saliva ejector.

- Slightly shortens the exposed length of the saliva ejector, making it less flexible, allowing for easier tissue retraction and better access.
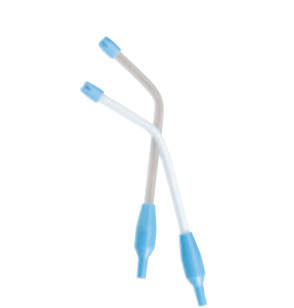

Safe-Flo™ SE Valve

- Use with your favorite saliva ejector brand, allowing you to continue to use your product of choice while protecting your patients against backflow.

Safe-Flo™ HV Valve

- Use with your favorite HVE tip brand, to prevent backflow in HVE lines.

Safe-Flo™ Adapter

- Allows the use of the HV suction line with a standard saliva ejector, providing a higher level of aspiration.

Safe-Flo™ Saliva Ejectors and Valves		
Ref. #	Description	Quantity

Saliva Ejectors

Comfort Plus™ Premium Saliva Ejectors

- The kinder, gentler saliva ejector...takes in fluid, not tissue!

- Tip design enhances patient comfort – will not grab mucosal tissue.

- Facilitates uninterrupted fluid and light debris removal.

- Optimizes fluid removal as tip design prevents tissue from blocking suction.

- Holds shape when formed as result of proprietary manufacturing process.

- Available in multiple color combinations, with and without scent.

Comfort Plus™ Premium Saliva Ejectors

Ref. #	Description	Quantity
ZWWCP	White/White	100/Bag
ZCWCP	Clear/White	100/Bag

ZETMVPK	Pink	100/Bag
ZETMVLV	Purple	100/Bag
ZETMVYE	Yellow	100/Bag
ZETMVP	Assorted (2 bags/color per case)	10 Bags/Case

Non-Vented Evacuator Tips

- Identical to Combo Tip™ Evacuators except both ends are non-vented.

Non-Vented Evacuator Tips

Ref. #	Description	Quantity
ZETNV	Non-vented, White	50/Bag

Slotted Tip

- Manufactured from high density polyethylene.

- Slotted end for increased suction.

- Stiff, firm construction allows for cheek retraction.

Slotted Tip

Ref. #	Description	Quantity
ZES50	Slotted, White	50/Bag

Sparkle™ Air Water Syringe Tips

- Requires no adapter – locking groove ensures tip is securely installed.

- Quad Core air channel ensures complete air/water separation.

- Translucent colors allow for visualization of water flow/blockage.

- Beveled edge provides increased patient comfort and safety.

- Rounded non-scratch end prevents O-ring damage.

- Single-use eliminates risk of cross-contamination and cleaning of syringe between patients.

- Quick, easy, economical.

- Available in 5 translucent colors and opaque white.

Made outside of the USA.

Sparkle™ Air Water Syringe Tips

Surgical Aspirator Tips

- Manufactured from durable, high quality polyethylene with a 30° angle.

- Tips are designed to fit all high-volume evacuation lines.

- Strong construction enables tip to be used for cheek retraction as it will not bend.

- Available in 3 tip widths.

Made outside of the USA.

Cotton and Non-Wovens

Cotton Rolls

- Made from 100% cotton.
- Contains no cellulose or rayon fibers.
- Soft, pliable, non-linting.
- Will not adhere to mucous membrane.
- Maintains shape when wet.
- Absorbs up to 9 times their weight.
- Available in Premium and Advantage Plus.
- Non-sterile.

Made outside of the USA.

Premium™ Cotton Rolls

Ref. #	Description	Quantity
DNC	#2 Medium 1.5 in x 0.375 in (3.8 cm x 1 cm)	2,000/Box

Advantage Plus™ Cotton Rolls

Ref. #	Description	Quantity
DNAC	#2 Medium 1.5 in x 0.375 in (3.8 cm x 1 cm)	2,000/Box

Cotton Rolls, Braided Non-Sterile

- Made from 100%, short fiber cotton, non-sterile.
- Bound by thin strands of polyester filament.
- Starch-free for maximum softness.
- Tightly braided to maintain shape when wet.
- Highly absorbent.
- Will not adhere to mucous membrane.

Made outside of the USA.

Cotton Rolls, Braided Non-Sterile

Ultra-Pure™ Non-Woven Sponges

- 4-ply, non-sterile.

- Biodegradable – a great way to reduce your carbon footprint!

- Made from 100% USA-grown cotton, providing increased comfort and faster absorbency when compared to rayon/polyester and cotton blends.

- Hypoallergenic, no toxic chemicals used in manufacturing process; all natural whitening process (H_2O_2 whitening) without use of bleach and/or chlorine.

- Exclusive automated manufacturing process reduces cross-contamination risks.

- Ideal for placement on incision/extraction sites as it easily releases, for increased patient comfort.

- Lint-free – extremely soft, smooth, strong and will not adhere to instruments.

Made outside of the USA.

Imaging Comfort

BiteWing-Ease™ Barrier Sleeves

- All-in-one seamless barrier sleeve, comfort cushion and bite tab that adjusts snugly to fit all types of sensors.

- Enables easy sensor positioning for a more accurate image.

- Bite tab thickness protects sensor cord.

- Used with digital sensors and Rinn® XCP® system components.

- Protects valuable sensors – quick, easy and economical.

BiteWing-Ease™ Barrier Sleeves

Ref. #	Description	Quantity
BWEL	Large, White Adjustable to fit all size 2 sensors	50/Box
BWES	Small, Blue Adjustable to fit all size 0-1 sensors	50/Box

Edge-Ease™ Cushions

- Provides a soft, comfortable edge to protect patient's soft tissue from digital sensor and x-ray film abrasions.

- Allows the patient to bite down harder on positioning devices for better positioning, resulting in more accurate images.

- Easily adheres to film packets, phosphor plates and digital sensor barrier sleeves.

- Economical – decreases necessity for retakes, saving both time and money.

Edge-Ease™ Cushions

Ref. #	Description	Quantity
BWEEB	Large, Blue Fits long edge of size 2 film and sensors	300/Box
BWEEW	Small, White Fits short edge of size 1-2 film and all 0-1 sensors	300/Box

It's-A-Wrap™ Barriers

- Seamless, cushioned barrier sleeve to maximize patient comfort, designed for use with Schick CDR disposable bite holder tabs and Rinn-style positioners.

- Fully adjustable to all sensor types and brands.

- Protects valuable sensors – quick, easy and economical.

It's-A-Wrap™ Barriers

Ref. #	Description	Quantity
BWRAPL	Large, Yellow Adjustable to fit all size 2 sensors	50/Box
BWRAPS	Small, White Adjustable to fit and all 0-1 sensors	50/Box

Sensor Slippers™ Cushions

- Cushioned, seamless sensor barrier sleeve for use with grippingstyle holders such as Rinn® Uni-Grip® Holder and Eezee-Grip® Holder.

- Stabilizes sensor in holder and prevents slippage enhancing the quality of the image.

- Creates softer edge that won't abrade corners of the mouth.

- Protects valuable sensors – quick, easy and economical.

Sensor Slippers™ Cushions

Ref. #	Description	Quantity
BWSSL	Large, Yellow Fits size 2 sensor	50/Box

All products on this page made outside of the USA.

Slip-Ease™ Cushions

- Unique protective cover slips over all brands of digital sensors, x-ray film, plates and positioning devices.

- Film adheres to cover with Safety Strip to prevent accidental aspiration.

- Smooths potentially sharp corners of film/sensors for increased patient comfort.

- Works best with gripping-style sensor/film holders.

- Requires just one for a full-mouth series using phopher plates or wireless sensors.

- Protects phosphor plates from scratching.

Slip-Ease™ Cushions

Ref. #	Description	Quantity
BWSEL	Large, Pink Fits size 2 film and sensors	100/Box

Wrap-Ease™ Cushions

- All-in-one seamless barrier sleeve, comfort cushion and positioning aid that fits all brands of sensors.

- Fully adjustable, all-in-one seamless barrier sleeve and positioning aid that fits all brands of digital sensors while maximizing patient comfort.

- Ideal for vertical bite wing images.

- Eliminates the need for disposable sensor holders.

- Protects valuable sensors – quick, easy and economical.
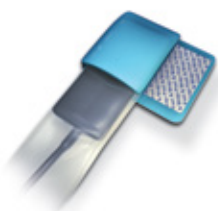

Wrap-Ease™ Cushions

Ref. #	Description	Quantity
BWWEL	Large, White Adjustable to fit all size 2 sensors	50/Box
BWWES	Small, Blue Adjustable to fit all size 0-1 sensors	50/Box

Bite Wing Tabs

- Self-adhesive, ensuring accurate, distortion-free bite wing radiographs.

- Holds securely when patients bite down ensuring precise positioning with enhanced patient comfort.

- Pop-out dispenser packaging is convenient, sanitary and economical.

- Attaches easily to both adult and pediatric size film.

Bite Wing Tabs

Ref. #	Description	Quantity
YBT	Bite Wing Tabs	500/Box

Digital Sensor Sleeves

- Manufactured from soft polyethylene with smooth seams to eliminate patient discomfort caused by similar sleeves with rough edges.

- Convenient sizing to accommodate all digital imaging sensors.

- Provides reliable protection against cross-contamination.

- Protects valuable sensors.
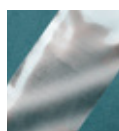

Smooth seams of the Digital Sensor Sleeve by Crosstex
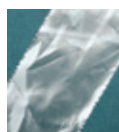

Rough seams of a traditional sensor sleeve

Operatory Protection

Bracket Tray Covers

- Manufactured from a unique, heavy weight paper.
- Impedes flow of moisture, minimizing seep-through.
- Available in multiple sizes and colors.

Bracket Tray Covers, Liquid-Proof

- Polyethylene-backed paper prevents seep-through.
- Available in two sizes, white only.

Dual use product:

- Poly-side down – provides positive moisture barrier.
- Poly-side up – provides ideal surface for quick mixing.

Made outside of the USA.

Lab Transport Bags

- Meets OSHA requirements and recommendation of NCCLS (National Committee for Clinical Laboratory Standards) for transport of medical specimens and/or dental lab cases.

- Convenient two-pouch system keeps Rx/lab slip separate from specimens/lab case as required by OSHA.

- Biohazard symbol for easy identification and OSHA compliance.

- Permanent adhesive closure does not contact gloved hand – tamper-evident.

- White front can be written on, allowing for easy recording of information.

- Quick, easy, economical.

Articulating and Occlusion Testing Materials

Articulating Paper, Foil & Film

- Combined use of articulating film, foil and paper to mark high and low occlusion points provides the most accurate way to mark every point of articulation.

- Proprietary manufacturing process combined with stringent quality control guarantees a clear, positive marking without smudging of wet or dry fields.

- Color-coded packaging and product descriptions make identification easy.

- Articulating paper available in straight, curved, curved with tabs and horseshoe.

- Articulating film and foil available in straight.

- Quick, easy, economical.

Dental Dam

Dental Dam, Latex, Powder Free/Low Protein

- Manufactured from medium modulus natural latex.

- Powder-free – less than 5mg/sheet (ASTM D6124).

- Low protein – extractable protein content is below FDA allowable claim limit of 50µg/g per sheet (ASTM D5712).

- High tear-strength.

- 100% non-chlorinated.

- Available in two sizes & three gauges, both mint flavored and unflavored.

Gauge measurements:

- Thin 0.125-0.160 / Avg 0.14 mm.

- Medium 0.165-0.200 / Avg 0.18 mm.

- Heavy 0.205-0.240 / Avg 0.22 mm.

Made outside of the USA.

Dental Dam, Non-Latex

- Not made with natural rubber latex.

- Use of non-latex products drastically reduces risk of allergic reactions for both patients and staff.

- Manufactured from polyisoprene.

- Does not contain carbamate esters.

- High tear strength.

- Gauge measurements:

  Medium 0.165-0.200 / Avg 0.18 mm.

Made outside of the USA.

Dental Dam, Non-Latex
6 in x 6 in (15.2 cm x 15.2 cm)

Sterilization

Crosstex Biological Monitoring Service — the largest sterilizer testing lab in North America

Millions of spore tests...1 Mission: To protect our diverse clientele. Medical, dental, veterinary, beauty, tattoo & piercing. Offering 24/7 online biological test results & clinical consultations for all clients. Committed to protecting your patients, your staff and your practice. Learn why our clients choose crosstex for sterility assurance:

- Mail-in spore test results in as little as 24 hours for steam, 72 hours for chemical, 7 days for dry heat and EtO upon receipt of spore strips in our laboratory.

- Compatible with dry heat, chemical EtO and steam sterilizers.

- Your choice of immediate test failure notification by fax or email with a follow-up phone call the next day from one of our customer care consultants.

- Sterilization results are faxed or emailed quarterly and annually.

- Check results online 24 hours a day on our secure confidential website.

- Third party documentation of test results provides a tangible record when proof of testing must be provided.

- Highly resistant dual-species bacterial spores provide the most reliable method of testing for an effective sterilization cycle.

- One of the most cost-effective methods of biological monitoring.

- OSAP Corporate Super Sponsor.

- Corporate member of AAMI, serving on many sterilization working groups.

- Participating corporate member with DIAC, DTA, HIDA, ADAA, ADHA.

For more information, please visit:

CrosstexBMS.com

Our sterilization products are the ideal way to ensure sterilizer performance by providing the highest level of sterility assurance available, combining mechanical, chemical and biological process parameters.

Every load, every day, every week. Because You Can't See Sterile™, Crosstex offers world-class mail-in sterilizer monitoring at CrosstexBMS.com. For in-office biological monitoring, get results in just hours with our ConFirm™ 10 Monitoring System for steam sterilizers. SteamPlus™ Type 5 Integrators can be used as an adjunct to the gold standard of biological monitoring.

Biological Monitoring

ConFirm™ 10 In-Office Biological Monitoring System

- In-office biological monitoring system provides final results in just 10 hours.

- Simply process test indicator vial in a normal steam sterilization cycle, remove, crush ampoule and place in incubator along with an unprocessed positive control vial for required 10 hour incubation period.

- Media in test vial will stay purple signifying a passed test and will turn yellow if any spores remain alive, thus signifying a failed test.

- Two incubator types are available: ConFirm™ 10 Digital Incubator and a standard dry block incubator.

- ConFirm™ 10 Incubators are equipped with a universal power supply for for 110 and 220 volts (specify when ordering).

- ISO 11138-1 and ISO 11138-3 Compliant.

Standard Dry Block Incubator made outside the USA.

ConFirm™ Mail-in Sterilizer Biological Monitoring Service

- The most comprehensive mail-in service in healthcare.

- Third party documentation of testing and test results provides a tangible online record when proof of testing and subsequent results must be provided.

- Results in 24 hours for steam, 72 hours for chemical vapor and 7 days for dry heat and EtO from start of incubation period at processing laboratory.

- Choice of immediate test failure notification by fax or email with a courtesy call the next day from a clinical advisor.

- Complimentary reminder service notifies practice of missed test date by either fax or email.

- Comprehensive test results are sent quarterly and annually by fax or email.

- MSM (Multi-Site Monitoring) Compliance Bridge complimentary service available for practices with multiple locations.

- Spore strips contain highly resistant dual-species bacterial spores providing the most reliable method of testing for an effective sterilization cycle.

Confirm™ Premium Test Service
Includes pre-paid postage.
Test strips can not be split between two sterilizers.

Ref. #	Description	Quantity
CST060	6 Tests (3 Strip Test, 2 Tests & 1 Control Strip)	1 Each
CST120	12 Tests (3 Strip Test, 2 Tests & 1 Control Strip)	1 Each

CVT120	12 Tests (2 Strip Test, 1 Test & 1 Control Strip)	1 Each
CVT520	52 Tests (2 Strip Test, 1 Test & 1 Control Strip)	1 Each

Chemical Monitoring

STEAMPlus™ Type 5 Integrators

- For use in steam sterilizers operating at 121°C to 134°C.

- Enhance sterility assurance protocol by monitoring every sterilization cycle.

- Provides a definitive pass or fail result allowing for release of all non-implant loads before results of spore strip test are received.

- Equivalent in performance to a biological indicator, and offers the highest level of sterility assurance from a chemical indicator.

- ISO 11140-1 Type 5 Compliant.
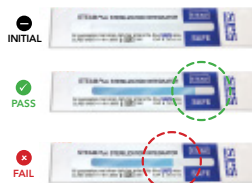

Does not replace weekly use of a biological indicator because it does not contain spores.

Note: As SteamPlus™ does not contain live organisms to prove lethality it does NOT replace the routine use/recommendations of biological monitoring

SSI-250	4 in x 0.75 in Strip (10.2 cm x 1.9 cm)	250/Pack

Type 4 Steam Indicator Strips

- For use in steam sterilizers or chemical vapor sterilizers operating at 132°C (270°F).

- During steam sterilization the check mark turns from white to black and during chemical vapor sterilization the check mark turns from white to brown or dark brown.

- Multi-parameter – indicates if all conditions for steam sterilization have been met: time, temperature and presence of steam or chemical vapor.

- Can be used with sterilization trays, pouches, tubing, autoclave bags and CSR wraps.

- ISO 11140 -1 Type 4 Compliant.

Instrument Packaging & Monitoring

AirView™ II Bowie-Dick Test Pack

- Specifically designed to easily detect presence of air in pre-vacuum steam sterilizers.

- Small, compact size reduces waste and storage space.

- Easy-to-read test sheet clearly identifies failures / can be filed for record keeping purposes.

- Lead-free ink reduces amount of hazardous waste / can be disposed in regular trash.

- Convenient exterior Chemical Process Indicators allow for easy verification of processed from unprocessed test packs.

- ISO 11140-5 Type 2 Compliant.

CSR Sterilization Wrap

- Highest bacterial filtration efficiency (BFE) available.*

- Highly permeable – efficient sterilant penetration.

- Petroleum- and polyolefin-free.

- Manufactured from environmentally-friendly cellulose material made from wood pulp, eliminating skin sensitivity issues associated with oily residues inherent in plastic-based material.

- Positive bacterial barrier to both airborne and waterborne contaminants.

- Exceptional tensile strength—wet or dry.

- For use with steam and EtO sterilization processes.

- EN ISO 11607-Part 1 and EN 868 – Part 2 Compliant.

*Data on File
Made in the USA from imported materials.

SW54	54 in x 54 in (137.2 cm x 137.2 cm)	100/Case

Instrument Packaging & Monitoring

Lead-Free Steam Indicator Tape

- Designed for use by health care providers to securely seal wrapped packs and to demonstrate that the unit has been exposed to a steam sterilization process.

- Made with adhesive and ink that is free of natural rubber latex, lead or solvents; safer for your patients, staff and the environment.

- Validated for use with all common dynamic-air-removal (pre-vacuum / SFPP) and gravity steam sterilization cycles, allowing simplified stocking of one tape for all steam sterilization needs.

- Made with a resilient pressure sensitive adhesive which securely seals sterilization packs, ensuring that sterile integrity is maintained during sterilization, transport and storage.

- Distinct ink color change from beige to dark brown/black when exposed to a steam sterilization process, easy to interpret indication of processed and unprocessed packs to avoid mix-ups.

- Saturated crepe paper provides the elongation needed for pack expansion during sterilization.

- Tape surface can be written on with indelible non-toxic ink to document appropriate information (e.g. date, sterilizer, contents, load/cycle).

- ISO 11140-1:2014 Type 1 Compliant.

Sterilization Pouches

Duo-Check™ Self-Seal Sterilization Pouches

- Internal and external indicators change color when processed, are easily visible, and are compatible with steam (indicators turn from pink to dark brown) and EtO (indicators turn from green to gold/brown).

- Blue-tinted transparent film provides easy instrument viewing and identification of punctures or tears in film.

- When properly sealed, sterility is maintained up the three (3) years provided the integrity of the pouch has not been compromised, i.e. pouch becomes wet, damaged or is opened during storage. Please refer to AAMI ST79 Section 11.1.3 Shelf Life, additionally, follow your facility policy on sterility maintenance.

- Meets ISO 11140 and 11607 standards for pouch performance.

- Meets ANSI/AAMI ST79 Comprehensive Guide to Steam Sterilization and Assurance in Healthcare Facilities.

- For use with steam and EtO sterilization processes only.

- Available in 15 sizes.

- Double pouch validation verified.

Sterilization Pouches

Sure-Check™ Self-Seal Sterilization Pouches

- Be sure! Triple your confidence with the world's most advanced sterilization pouches with with Type 4 multi-parameter internal/external indicators for steam sterilization processes.

- The first pouch with built-in internal/external multi-parameter indicators that only change color when all 3 criteria for steam sterilization have been achieved: specific time, specific temperature, and specific exposure to sterilant.

- When used in steam processes pink indicators will turn dark brown. When used in EtO processes green indicator will turn gold/brown.

- Eliminates the extra step of adding separate Type 4 multi-variable internal indicators to each pouch.

- When properly sealed, sterility is maintained up the three (3) years provided the integrity of the pouch has not been compromised, i.e. pouch becomes wet, damaged or is opened during storage. Please refer to AAMI ST79 Section 11.1.3 Shelf Life, additionally, follow your facility policy on sterility maintenance.

- Meets ANSI/AAMI ST79 Comprehensive Guide to Steam Sterilization and Assurance in Healthcare Facilities and CDC Guidelines for Disinfection and Sterilization in Healthcare Facilities 2008.

- For use with steam and EtO sterilization processes only.

- Available in 14 sizes.

- Meets ISO 11140-1 Type 4 and 11607 standards for pouch performance.

- Double pouch validation verified.

Self-Sealing Autoclave Bags, Paper

- Unique hospital double-fold seal with pull-off adhesive tab.

- Gusset feature provides 50% more inner space.

- Color process indicators – steam.

Made outside the USA.

Self-Sealing Autoclave Bags, Paper

Ref. #	Description	Quantity
OC	2.5 in x 10.5 in +1.5 in Gusset (6.4 cm x 26.7 cm + 3.8 cm Gusset)	1000/Carton
OCS	2.5 in x 8.75 in +1.5 in Gusset (6.4 cm x 22.2 cm + 3.8 cm Gusset)	1000/Carton

Self-Seal Nylon Sterilization Pouches

- Manufactured for use with dry heat processes up to 420°F (215°C).

- Material is clear, strong and puncture-resistant with self-seal adhesive closure.

- Complimentary external chemical indicator labels are included with every box.

- Pouches are notched for ease of opening after processing.

- Available in 5 sizes.

Self-Seal Nylon Sterilization Pouches

Sterilization Tubing

Sani-Roll™ Sterilization Tubing

Manufactured from medical-grade paper with external process indicators that change color when exposed to a steam and EtO sterilization processes.

Convenient, economical way to package instruments – use only as much as you need.

- Blue-tint laminate easily identifies if film has been compromised due to punctures and/or tears.

- For use with steam and EtO sterilization processes only.

- Available in multiple sizes and lengths.

Sani-Roll™ Sterilization Tubing
