DERMASSIST® COATS™
POWDER-FREE LATEX EXAM GLOVES

Finally, an all-natural solution to dry, damaged skin, that's naturally effective!

Our new COATS™ barrier technology utilizes nature's own skin protectant remedy, all natural, beta-glucan rich, colloidal oatmeal USP. Known for its anti-irritant and anti-inflammatory properties, colloidal oatmeal USP is also recognized by the Food and Drug Administration as a skin protectant drug.

COATS™ barrier technology is a **totally powder free**, all-natural physical barrier between the glove surface and the wearer's skin. The colloidal oatmeal barrier not only shields the skin surface from the glove, it also **creates a moisturizing, and pH balancing environment** that helps dry, damaged skin to repair itself, and helps to keep healthy skin healthy!

And healthy skin is the body's best defense against infection. What a naturally great idea!
