#### Cement

Ready-mixed RelyX™ Unicem 2 Automix Cement is applied directly in the root canal with an endo tip.

#### CLINICAL TIP:

We recommend using a 3M™ ESPE™ Retraction Capsule in cases where moisture management during post seating and core build-up is required.

### **Post**

RelyX™ Fiber Post 3D Glass Fiber Posts are placed in the root canal. No pre-treatment is required.

### **Adhesive**

Scotchbond™ Universal Adhesive is applied.
No additional primer is required.

# Core build-up

Building the core around the post with Filtek™ Bulk Fill Posterior Restorative.

Post and core build-up after final preparation.

#### Ordering Information

Item No.	Product Information
RelyX™ F	iber Post 3D Glass Fiber Post
56957	Introductory Kit
	20 posts sizes 0, 1, 2, 3 (5 posts of each size),
	5 drills sizes 0, 1, 2, 3, Universal (1 drill of each size)
56958	Trial Kit with RelyX™ Unicem 2 Automix Cement
	10 posts sizes 1, 2 (5 posts of each size), 3 drills sizes 1, 2,
	Universal (1 drill of each size), 1 RelyX™ Unicem 2 Automix
56960	Syringe A2 – 8.5 g, 10 mixing tips, 10 endo tips
36960	Post and Core Build-up Kit with RelyX™ Unicem 2 Automix Cement
	1 Trial Kit RelyX™ Fiber Post 3D/RelyX™ Unicem 2 Automix
	Cement, 20 capsules Filtek™ Bulk Fill Posterior Restorative
	A3 - 0.2g each, 1 vial Scotchbond™ Universal Adhesive - 5 m

# 3M.com/RelyX3D

3M post and core solution. Featuring RelyX™ Fiber Post 3D.

### For predictable results - in less time.

We know: The endodontic procedure is very complex. So the simpler and more reliable the endodontic restorative procedure is, the better – for both the dentist and the patient. The excellent 3M post and core solution is a big step forward in this regard: With significantly fewer clinical steps and fewer products, it lets you work faster, easier and more efficiently.

### All you need to do is take four steps.

The 3M post and core solution not only simplifies your work but also helps you deliver predictable, robust outcomes – from root to core. All you need is the new RelyX™ Fiber Post 3D Glass Fiber Post plus three other easy-to-use products from 3M Oral Care: RelyX™ Unicem 2 Automix Cement, Scotchbond™ Universal Adhesive, and Filtek™ Bulk Fill Posterior Restorative.

These four products – each of them proven to make your work more reliable and efficient – have one common objective: Simplify the complex!

Five drill sizes (including one universal drill).

Fewer clinical steps, fewer products.

# RelyX™ Fiber Post 3D Glass Fiber Post – With a unique 3D design for more confidence

RelyX Fiber Post 3D builds on the 8 years of clinical success of the proven product RelyX Fiber Post. Now, we have further improved it to enhance your peace of mind:

- Higher mechanical retention to the core build-up material thanks to coronal 3D macro retention.
- Strong bond in the root canal due to its microporous surface without a silanating step.
- Better post position control thanks to excellent radiopacity.
- Low risk of root fracture due to dentin-like elasticity.
- More esthetic option than a metal post.

# Cement

#### RelyX™ Unicem 2 Automix Self-Adhesive Universal Resin Cement

RelyX Unicem 2 Automix Cement not only offers excellent bond strength but also saves you precious time, as you do not need to etch, prime or bond.

The handy automix syringe, together with the endo tip, lets you apply the ready-mixed cement directly in the root canal from bottom to top.

With one application – and virtually no voids.

# Adhesive

#### Scotchbond™ Universal Adhesive

Scotchbond Universal Adhesive provides a reliable bond of the core build-up material to the post and tooth structure – with no need for an additional primer.

One application – done!

# Core build-up

#### Filtek™ Bulk Fill Posterior Restorative

Excellent material and handling characteristics make Filtek Bulk Fill Posterior Restorative a favorite core build-up material, especially for big lesions in combination with a post: The new capsule design ensures a void-free application. The material is sculptable but also easy to adapt to both tooth structure and post. And, for easier preparation, the cured material cuts like dentin. Core build-ups can be done faster and easier.

With one application up to 5 mm.
