

# BARRIER PROTECTOR

## Introducing Palmero's Tablet Barrier Sleeves!

Portable touch screen tablet devices have improved healthcare setting operations, however disinfection requirements and the risk of cross-contamination can be challenging.

The Palmero Tablet Barrier sleeve is designed to protect sensitive touch screen tablet devices and provide infection prevention by mitigating cross-contamination of harmful pathogens.

This easy to use sleeve fits comfortably over a tablet with or without a case to promote use in the healthcare environment. The single-use disposable sleeve is made of a material that does not impede touch screen operations and has an adhesive on the flap to securely hold the tablet inside.

- Easy application disposable sleeves accelerate operator turnover
- Adhesive strip securely protects touch screen tablet device
- Prevents cross-contamination by minimizing disinfection requirements
- One-size, compatible with iPad® or tablet
- Does not contain latex
