INFECTION PREVENTION

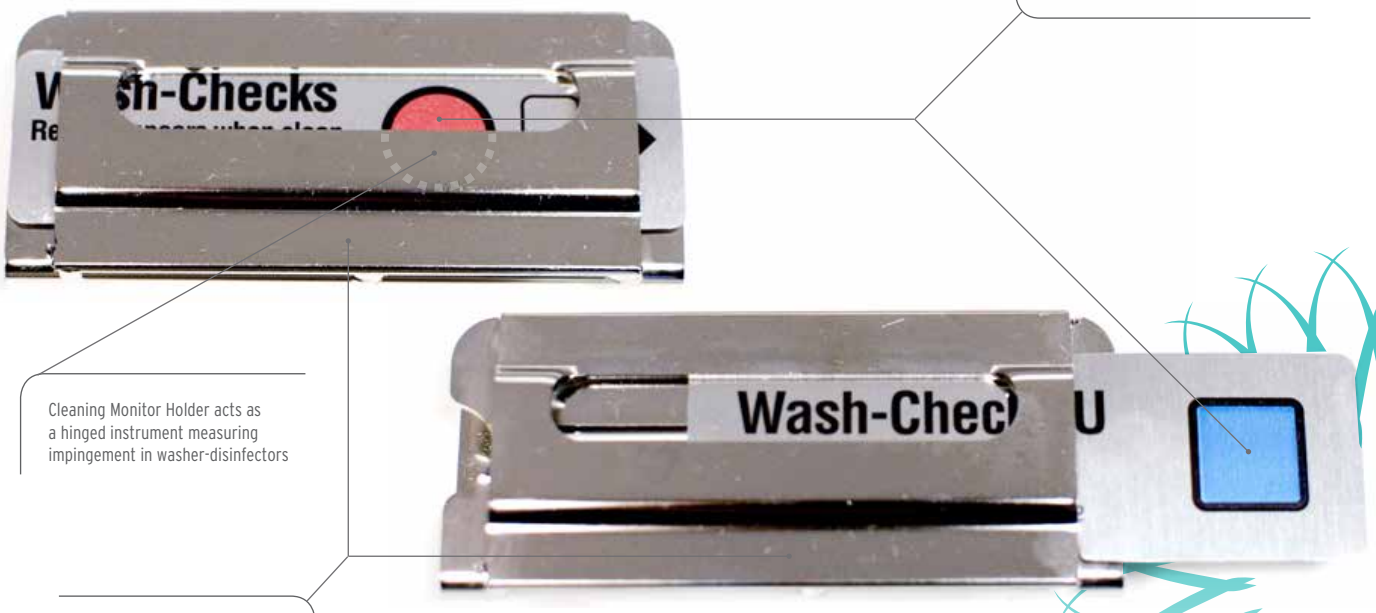
Hu-Friedy's

CLEANING MONITORS

Quality Assured

Proper instrument cleaning is the most important step to instrument reprocessing. If an instrument is not properly cleaned, it cannot be effectively sterilized. Take the steps to assure that your cleaning process achieves the highest quality results by incorporating Hu-Friedy Cleaning Monitors into your instrument reprocessing protocols. Using multi-parameter testing, Hu-Friedy Cleaning Monitors are designed to give you a clear interpretation of your cleaning process.

POINTS OF PERFORMANCE



Ideal Cleaning Monitor Usage

WASHER-DISINFECTOR

Run a monitor test in the morning to release the equipment for use and minimum of one monitor per load for load release.

ULTRASONIC CLEANING

Monitor once daily with an empty load for a machine release and periodically throughout the day with instruments for a load release, if needed.

How the best perform Hu-Friedy®

CLEANING MONITORS

CLEAR & SIMPLE RESULTS INTERPRETATION

Removal of all test soil indicates effective cleaning

	Washer-Disinfector	Ultrasonic
Fail (Unexposed)		
Fail		
Pass		

See Trouble Shooting Charts (N1736 and N1692) for possible reasons for results and corrective actions.
