

For decades, Handler has been the trusted source in the dental equipment industry.

26105SSWCEL Stainless Steel Denture Processing System

complete with vented cabinet allows the technician to Boil out, Wash out and Cure dentures. Designed and manufactured by Handler, the dual tank production system with separate temperature controls gives the technician the ability to cure in one tank while using the other tank to wash out or boil out. This processing method will increase efficiency in your lab and provide you with years of service.

Don't trust your denture processing to anything less.

26105SSWCEL
