HALYARD, YOUR PARTNER IN COMPLIANCE TO THE NEW MASK STANDARD

AS 4381:2015 IS THE NEW STANDARD FOR SINGLE-USE FACE MASKS

Studies show that fluid strikes the face area of OR staff an average 45–51% of the time.¹ Surgeons are particularly at risk, with 90% not aware they've been splashed.²

This puts you, your staff and your patients at considerable risk.

YOU, YOUR STAFF AND YOUR PATIENTS NEED THE RIGHT FACIAL PROTECTION

Halyard face masks give you the confidence that you and your patients are protected.

- ✓ All HALYARD* FLUIDSHIELD* Masks meet the new Australian Standard AS 4381:2015.
- ✓ FLUIDSHIELD* Masks are available in Level 1, Level 2 and Level 3.
- ✓ The level of protection is clearly labelled on the mask nose piece and on the box, so you and your staff can easily identify the right mask for each task.

NEW STANDARD AS 4381:2015 (RED INDICATES CHANGE)				
AS 4381: 2015 SINGLE-USE FACE MASKS				
CHARACTERISTICS	LEVEL 1	LEVEL 2	LEVEL 3	TEST METHOD
	Level 1 barrier medical face mask materials are evaluated for resistance to penetration by synthetic blood at the minimum velocity specified in Table 2, bacterial filtration efficiency and differential pressure. APPLICATIONS: For general purpose medical procedures, where the wearer is not at risk of blood or bodily fluid splash or to protect staff and/or the patient from droplet exposure to microorganisms (e.g. patient with upper respiratory tract infection visits GP)	Level 2 barrier medical face mask materials are evaluated for resistance to penetration by synthetic blood at the middle velocity specified in Table 2, bacterial filtration efficiency and differential pressure. APPLICATIONS: For use in emergency departments, dentistry, changing dressings on small or healing wounds where minimal blood droplet exposure may possibly occur (e.g. endoscopy procedures)	Level 3 barrier medical face mask materials are evaluated for resistance to penetration by synthetic blood at the maximum velocity specified in Table 2, bacterial filtration efficiency and differential pressure. APPLICATIONS: For all surgical procedures, major trauma first aid or in any area where the health care worker is at risk of blood or bodily fluid splash (e.g. orthopaedic, cardiovascular procedures)	
Bacterial Filtration Efficiency (BFE) %	≥ 95%	≥ 98%	≥ 98%	ASTM F2101-14 or EN 14683:2014
Particulate Filtration Efficiency (PFE) % (0.1 µm)	Not Required	Not Required	Not Required	N/A
Differential Pressure (Delta P) mm H ₂ O/cm ²	< 4.0	< 5.0	< 5.0	EN 14683:2014
Resistance to penetration by synthetic blood (fluid resistance) min pressure in mm Hg for pass result	80mm Hg	120mm Hg	160mm Hg	ASTM F1862 / F1862M-13 or ISO 22669

SUPERIOR PROTECTION NEVER FELT SO GOOD

FLUIDSHIELD* masks not only provide superior cover, with four layers of barrier protection; they also feature an inner SO SOFT* lining to deliver the critical balance between protection and clinician comfort.

FACIAL PROTECTION

For the highest levels of protection, make sure you choose **HALYARD* Face Masks and Eyewear**.

NIOSH APPROVED N95 RESPIRATOR FACE MASKS

- Provides fluid resistance at 160mm Hg
- The highest level of protection available
- Recommended for Laser Procedures

46727

Code	Description	Packaging
46727	FLUIDSHIELD* Level 3 N95 Particulate Filter Respirator and Surgical Mask, Pouch-Style with Headbands, Regular Size, Orange	Eaches/Box = 35 Boxes/Case = 6 Eaches/Case = 210
46827	FLUIDSHIELD* Level 3 N95 Particulate Filter Respirator and Surgical Mask, Pouch-Style with Headbands, Small Size, Orange	Eaches/Box = 35 Boxes/Case = 6 Eaches/Case = 210

FLUIDSHIELD* FACE MASKS

- Provides fluid resistance at 160mm Hg
- Level 3 printed on mask nose piece and box
- Four layers of fluid resistance and bacterial challenge
- Superior comfort without compromising your protection with SO SOFT* inner lining
- Setting a new benchmark with POWERGUARD* protection

FACIAL PROTECTION

EYEWEAR

GUARDALL* FACE SHIELD

- Designed for procedures and environments where risk of exposure to blood and/or bodily fluids through splashing is possible
- Equipped with a foam band and headband
- Can be worn with or without glasses or goggles
- Resistant to fogging

Code	Description	Packaging
41204	GUARDALL SHIELD* Full-Length Visor Only, (No Mask), Clear	Eaches/Case = 40
41205	GUARDALL SHIELD* Three-Quarter Length Visor Only (No Mask), Clear	Eaches/Case = 40

SAFEVIEW* GLASSES

- For use in situations which may involve splashing or spraying
- Designed to be lightweight for added comfort in use
- Shipped with colorful frames to appeal to a variety of preferences
- Single-use lenses may be easily replaced into reusable frames
- Designed to be easily worn over most prescription glasses
- Constructed from natural rubber latex-free materials

Code	Description	Packaging
SV50A	SAFEVIEW* Assembled Glasses	5 Pkg. of 10 Each Case = 50 Assembled Glasses
SV100F	SAFEVIEW* Frames / Assorted Colours	10 Pkg. of 10 Each Case = 100 Frames

FACIAL PROTECTION

TEST METHODS FOR FACE MASKS

BACTERIAL FILTRATION EFFICIENCY (BFE) AT 3µm: ASTM F2101

Determines the bacterial filtration efficiency (BFE) of various filtration materials. This test employs a ratio of the bacterial challenge counts to sample effluent counts to determine the percent bacterial filtration efficiency (%BFE). The test procedure allows a reproducible bacterial challenge to be delivered to test materials, and provides a standard procedure for comparison of filtration materials.

The higher the BFE, the better the filtration efficiency, the better the protection.

DIFFERENTIAL PRESSURE OR BREATHABILITY (DELTA P): 4.4.1.2 of MIL-M-36954C

Determines the air exchange differential of porous materials measured in mm H₂O/cm². This technique employs a water manometer differential upstream and downstream of the test material at a constant flow rate.

**The lower the delta P, the more breathable the material is.
However, this can also mean lower levels of protection.**

FLUID RESISTANCE: ASTM F 1862

Standard Test Method for Resistance of Medical Face Masks to Penetration by Synthetic Blood (Horizontal Projection of Fixed Volume at Known Velocity).

Developed to simulate a challenge to the fluid splash resistance of a face mask under conditions similar to actual use. During this test, face masks are insulted with synthetic blood, and graded as a pass or fail. The masks are evaluated at three pressures: 80, 120, and 160mmHg.

The higher the pressure at which a mask passes, the greater the fluid resistance.

NATIONAL INSTITUTE FOR OCCUPATIONAL SAFETY AND HEALTH (NIOSH) Certification for Particulate Respirators: 42 CFR 84 Certified in USA

NIOSH Certification ensures the respirator has undergone the stringent testing and quality assurance requirements to meet an expected level of protection.

If a respirator has been NIOSH-certified, it will have the following markings on the respirator's packaging, user instruction insert, and/or on the respirator itself:

- The NIOSH name or logo;
- The NIOSH filter classification – in this case "N95";
- The NIOSH test and certification – or TC – approval number;
- The Approval Holder's business name (usually the manufacturer), registered trademark, or an easily understood abbreviation;
- The model or part number; and
- The manufacturing lot number.

The respirators certified under the NIOSH 42 CFR 84 regulation are tested under much more demanding conditions, providing a higher level of worker protection.

EXAMINATION GLOVES

THE WORRY-FREE CHOICE FOR EVERYONE, EVERYWHERE

Your hands are essential to the care you provide to your patients. With 5–15% of healthcare workers susceptible to latex allergy, caring for you and your hands by reducing the exposure to latex reduces the risks and harmful effects of an allergic reaction¹.

Halyard Health has created a patented, natural rubber latex-free glove to provide you with the comfort, fit and sensitivity of latex, without the risk of exposure.

It's the one glove for all your non-surgical needs, facility-wide².

INNOVATION IN PACKAGING TO REDUCE CROSS CONTAMINATION AND WASTE

As part of our commitment to reducing the risk of HAIs, Halyard introduced the SmartPULL* glove dispensing system to our STERLING* and LAVENDER* Nitrile Exam Glove boxes.

Our advanced packing technology has also reduced the waste in storage space with the larger, 200–250 count per box providing you with more for less.

The smaller tab reduces the risk of contamination and waste by limiting the contact and potential fall-out from adjacent gloves.

The larger tab enables easier access as the box empties.

SEQUENCE FOR DONNING PERSONAL PROTECTIVE EQUIPMENT (PPE):

1. PROTECT YOUR BODY

Ensure the gown:

- Covers torso from neck to knees
- Covers arms to end of wrists
- Wraps around the sides to fasten at neck and back

2. PROTECT YOUR FACE

- Create a curve in the flexible band for the nose bridge and expand the mask
- Secure the ties or elastics at the middle of the head and neck, or fasten the ear loops
- Fit it snugly to your face and below your chin – fit check the N95 and P2 mask
- Place the face shield or eyewear over the face and eyes and adjust to fit

3. PROTECT YOUR HANDS

- Extend the cuffs to cover the wrist of the gown
- Limit the surfaces touched
- Change gloves when torn or heavily contaminated
- Perform hand hygiene as required

FINALLY
STOP and
CHECK all PPE
is in place

SEQUENCE FOR ADVANCED DOFFING PERSONAL PROTECTIVE EQUIPMENT (PPE):

Remember! The outside and front of your PPE, including the sleeves of the gown, are contaminated. If hands become visibly contaminated during PPE removal, wash hands before continuing.

REMOVE GOWN THEN GLOVES

Outside of gown and gloves are CONTAMINATED!

1a.

- With gloved hands, grasp the front of the gown at the shoulders and pull the gown forward to snap the tabs at the back
- Peel off the gown, rolling it inside out

1b.

- Continue over the gloves so that they too are rolled inside out
- Discard gown and gloves into a waste container
- Perform hand hygiene using ABHR or soap and water

2. REMOVE PROTECTIVE EYEWEAR

- Grasp the ear or head piece and lift away from face
- Place reusable eyewear in the designated receptacle for cleaning or
- Discard disposable eyewear into waste container for disposal

3. REMOVE MASK OR PARTICULATE RESPIRATOR (N95 OR P2)

- Remove by touching ties or elastics only, starting with the bottom then top ties or bands
- Discard in designated waste container

4. PERFORM HAND HYGIENE

- Wash hands with soap and water or use an alcohol-based hand rub immediately after removing PPE

PROTECTIVE APPAREL

HALYARD* ISOLATION GOWNS

- For use when expected risk of exposure to fluid is between low and moderate
- Medium-weight tri-layer fabric
- Tape-tab neck closure
- Tie waist, elastic cuffs
