TIDI® Contour Bibs provide 30% more coverage than standard dental bibs. Three ply tissue offers extra absorption, while the poly backing provides a durable moisture barrier.

TIDI® Propy Bibs provide oversized protection for extended and messy procedures. Constructed of a poly layer sandwiched between two layers of tissue (tissue/poly/tissue), the Propy Bib provides coverage over the shoulders and arms and is available in waist and knee length styles.

Propy Bibs

TIDI® Cups complement the colors and designs of our complete line of paper products. Sturdy ribbed design provides patients with a sure-handed grip.

TIDI® Tray Covers are available in a multitude of pleasing colors & coordinate with TIDI® Dental Bibs. Heavyweight covers provide extra thickness and increased strength with low absorbency.

Keep the headrest sanitary and dry while extending the life of the dental chair with **TIDI®** Headrest Covers. Available in the most popular sizes and colors in tissue/poly, patented **FABRICEL®** and economy poly.

TIDI® offers premium quality non-linting, long fiber virgin cotton rolls that are machine rolled into soft, pliable absorbent cylinders. Available sterile or non-sterile. **Venture®** cotton rolls offer great quality at an economical price.

Nonwoven sponges feature 4-ply fabric. **OMNISORB® II** and **Venture®** nonwoven sponges are available in a closed weave for maximum absorbency, or an open weave, offering superior strength and quick wicking for faster absorption of fluids. Low linting minimizes infection complications.

Also referred to as exodontia sponges, cotton filled sponges offer maximum absorption.

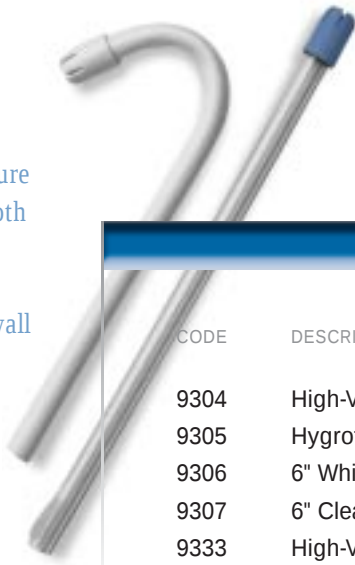

Gauze sponges are made from pure, natural cotton gauze, bleached and processed to exacting standards for maximum wound protection.

OMNISORB® II nonwoven sponges are made in the U.S.A. and offer superior performance.

Venture® brand products provide a quality, economically priced alternative.

TIDI® Saliva Ejectors feature a securely fastened, smooth tip for patient comfort. Copper-plated wire is molded into the wall of the shaft for safe and trouble-free bending.
