ARE YOU SURE?

*Are you **CONFIDENT** you are protecting your patients and your equipment?*

Custom Fit Sheaths & Barriers

TIDIShield® Custom Barriers provide you with ultimate infection prevention without interfering with the performance of your equipment. Provide an enhanced patient experience without the risk of cross-contamination.

Curing Light Sleeves
with *The SureCure Window™*

Intra-Oral Camera Covers
with *The SureClear Window™*

Market Leader in Custom Fit Protective Barriers

TIDIShield®

Curing Light Sleeves

with *The SureCure Window™*

CONFIDENT CURES

The TIDIShield® Curing Light Sleeve with *The SureCure Window™* is proven to produce cured restorations equal to those where no barrier is used.*

INFECTION PREVENTION

Unique individually wrapped, easy-peel outer wrapping protects inner sleeve from contamination. Eliminates the potential for bacteria build-up on curing light surfaces.

COMFORT

Custom fit with soft, rounded edges for greater patient comfort.

COST-EFFECTIVE

Extends the life of expensive equipment. Prevents hard to remove composite build up on the curing light tip.

You can now be
CONFIDENT
that the quality and depth of cure is
not adversely affected by using a
custom fit barrier.

You can be
SURE
that you have a quality
restoration while protecting your
patients from cross-contamination.
Barriers reduce the need for using
harsh disinfectants, thus extending
the life of your expensive curing lights.

TIDIShield®

Intra-Oral Camera Covers

with *The SureClear Window™*

- Custom fit eliminates distortion
- The SureClear Window™ provides superior image quality
- Individually wrapped for enhanced infection prevention
- Unique easy peel design
- Extends the life of equipment by reducing the need for using harmful disinfectants on your intra-oral camera.

COMPETITOR SHEATH

A competitor's camera sheath gives the dentist a blurry picture, making the view of the tooth difficult

TIDISHIELD™ BARRIER

A TIDIShield™ Custom Barrier, with it's tight fit around the camera, provides a perfect view and superior infection prevention

NO SHEATH

Without a protective sheath, the intra-oral camera offers an unobstructed view, but with the threat of cross-contamination
