

3M™ Filtek™ P60 Posterior Restorative

Rapid cure time and excellent performance.

With its speed and handling, it's way out front among posterior restoratives. And its stylish beauty makes it a winner with patients too.

3M™ Filtek™ P60 Posterior Restorative offers:

Superior Packability – Packs well without sticking to instrument. Excellent marginal adaptation and interproximal contact.

Easy Sculpting – With exceptional resistance to slumping.

Fastest Placement Technique – Takes only 20 seconds to cure an increment of 2.5mm.

Low Polymerization Shrinkage – Less stress on the tooth, less sensitivity potential for the patient.

Excellent Wear Resistance and Strength – Means you can be confident of long-lasting posterior restorations.

It's everything you could ask for in a posterior restorative.

KEY FEATURES

- EXCELLENT HANDLING
- FASTEST PLACEMENT
- LOW SHRINKAGE
- EXCELLENT WEAR RESISTANCE AND STRENGTH

Placement Technique Summary

Adhesive	49	77	62	111
Liner			45	
Composite for 5mm depth	40	70	40	120
Seal			75	
Total time	89	147	222	231
	Filetek™ P60	SureFil™	ALERT™	Solitaire™

Time in Seconds

Does not include manipulation time.

It's the ultimate time-saver. 3M™ Filtek™ P60 Posterior Restorative cures in a quick 20 seconds for a 2.5mm increment. That's time you can apply toward your next procedure.
